Stretched Saddlebag Bottom Set

• Includes right and left side with black unfinished surface.
• This saddlebag set is a perfect fit with all mounting holes that match stock locations, may re-use stock hardware for a true bolt-on experience. All mount holes are pre-drilled in stock location and pre-fit for the ease of installation.
• The bottoms are 2” deeper in the front than stock and 3” deeper in the rear, which gives these the stretched look.
• Designed for models with dual exhaust.
• Complete hinge, latch, and hardware kit is available separately for Road King riders looking to keep stock bags complete or for converting from leather covered bags. Order lids separately.

The typical airflow pattern of the wake from most windscreens is called a van Karman vortex. At speeds of 50-90 mph, the air swirls off the windscreen in an approximate 90-degree segment of rotation, hits the bottom of the rider's neck on the way up, and curves off the shoulder at approximately 45 degrees.

The patented "V" shape is so quiet because it pushes this vortex out and away from the side of the rider's head. The rider's helmet then resides in still air, and the passenger's environment is greatly improved as well.

Reduced wind noise... less turbulence... superior strength... perfect style. The VStream revolution is here!

Duro Soft | **Duro Ceramic** | **Duro Semi Metallic** | **Veloprene** | **Duro Sintered** | **SBS Sintered** | **SBS Ceramic** | **SBS Carbon Tech**

Duro Soft designed to be compatible to all types of brake discs.
Duro Ceramic for general purpose use on carbon steel brake discs.
Duro Semi Metallic durable and have a reputation of excellent heat transfer for all types of brake discs.
Veloprene is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.
Duro Sintered excellent stopping on all types of brake discs
SBS Sintered provides maximum stopping power with stainless steel discs.
SBS Ceramic for general purpose use on carbon steel brake discs
SBS Carbon Tech for use on all stock or aftermarket calipers and work well with stainless steel or cast iron discs.

51-1609

Touring Chassis Component

The Touring Torque Linkage System

• No modifications are necessary to install this unit. After the unit is installed it will eliminate the lateral movement while still allowing the Iso mounted factory design of the “floating” drive train to move vertically as designed through connecting the rear of the transmission case to the frame. The kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration.

VT No.	Finish	Fits
51-1609	Black	FLT 1991-2008

Note: Installation on 1993-2001 models require 27-1235 foot peg spacer set as shown. Purchase 27-1235 separately.

FLT Replacement Shock Absorbers

•Nitrogen-charged steel monotube damper bodies with hard chrome-plated shafts
•Progressively wound springs for a smooth, comfortable ride
•Adjustable spring pre-load
•Mount with existing hardware
•Available in several lengths to suit most riding styles
•Sold in pairs

Note: Lowering the motorcycle will reduce ground and cornering clearance.

Note: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swing-arm/ axle to exhaust contact, as well as chain/ belt guard or tire contact.

Note: OEM upper shock mount covers will not fit with these shocks.

33-1737

33-1738

SMD LED H4 Headlight "Bulbs"

These LED projector bulbs feature state of the art SMD technology and have a heavy duty construction unlike conventional bulbs, a high resistance to torsional frame vibrations.

• The high powered patterned SMD type LEDs provide maximum illumination.

• Bulbs come complete with socket adapters to allow fitment with any headlight with H4, HS1, BA20D, T19, P43T or P45 base. High Beam is 1,500 Lumen at only 18 Watt low beam is 1,000 Lumen at only 12 watt, which is better as a common H4 bulb. Does not require the installation of separate ballast as these bulbs feature a built-in rotary cooling fan.

LED H4 Bulbs.

27-1235	Contour

51-1601 Installed shown with 27-1235

Touring Torque Linkage System features a chrome finish and will fit all Touring models with no modifications necessary to install unit. This unit will eliminate the lateral movement while still allowing the Iso mounted factory design of the "floating" drive train to move vertically as designed through connecting the rear of the transmission case to the frame. Kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration. Fits 1993-2008 FLT.

VT No.
51-1602

Extreme Duty Battery Cable Sets.

•#2 gauge wires are very fat and flexible.

• The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket.

• Sealed and insulated with black heat shrink tubing means no moisture will get in these cables.

VT No.	Year	Length

Mount Bracket Kit

• Simplifies the process of securing your bike to a trailer or lift. These stylish brackets mount cleanly to the front fork cover to connect tie down straps.

• Moving the tie down point from the handlebar to the triple tree area reduces wear on the handlebar bushings and ensures a consistent easy to access mounting point.

• Includes mounting hardware.

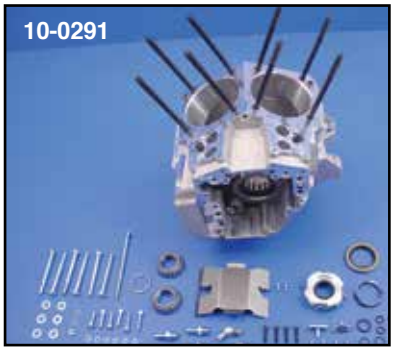
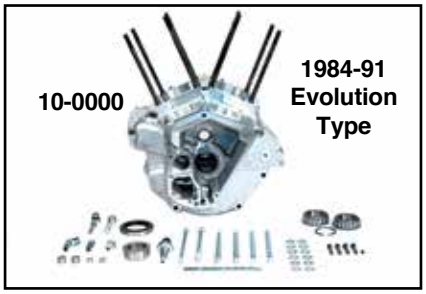
Chrome Engine Case Allen Bolt Kit fasten engine case halves together. Fits 1983-95 Big Twin Evo.
VT No. 37-9191

Ship in your Twin Cam Flywheel and we will remove the old sprocket shaft bearing and replace with new extreme duty bearing. Service requires work order number. Please contact our Motor Shop Department.



For TC-88 Models



S&S Crankcase Sets are shipped set up with Timken left side bearing and race assembly, seal and seal spacer, oil pump drive bushing, needle bearing and pinion race for right side, (pressed in and line honed) ready to assemble. Also included are cylinder studs, nickel plated case bolts, crankcase fittings and a timing and magnetic drain plug. Accepts wheels up to 8½" diameter. Note: Oil pump required for assembly.

Replacement Ring Sets for S&S Pistons only are for two pistons with 4¼" and .010 O.S.
VT No. 11-1401

Crankcase Set

Our Motor Shop can install this update for you!

Extreme Duty Left Side Main Bearing Kit is for all 2003-17 Twin Cam models. Includes bearing, spacer, thrust washers and snap ring. When high-performance engine modifications are made, the increased torque is transferred via the crankshaft to the drive system, putting a significantly higher load on the bearing. The extreme duty bearing is case hardened on the inner and outer race to provide increased load capacity and enhanced durability in high-torque applications. Installed in the left side of the crank case and supports the output shaft to the primary drive system.
Fits 2003-17 FLST, FXST, FXD, FLT.

Flywheel

Complete Stock Stroke Flywheel Assembly is shipped assembled and trued with shafts. VT No. 10-1091 requires the use of 1987-up type Pinion Shaft Bearing assembly and VT No. 12-0967 late bearing retainer.

VT No.	OEM	Fits	Note
10-1091	23906-78G	1984-90 FXST, FLST	1,2
10-1042**	23906-93B	1993-99 FXST, FLST FXD, 1993-84 FXR	1,2

Notes:
1. Features replaceable pinion and sprocket shafts and narrow sprocket side flywheel
2. Require use of 1987-up type pinon shaft bearing and retaining ring.

S&S Twin Cam 3 Piece Flywheel Assemblies feature heat-treated 4140 material that is 114% stronger than stock. Larger 1.671" crankpin for increased crank-pin clamping force. Integral main-shafts eliminates two potential points of weakness. Reduced main-shaft deflection at high rpm, less vibration, reduced piston and rod side thrusting, prevents oil pump damage, fully compatible with gear drive cams. 2007-up stock rod length is 7.659". Stock pistons in 2007 and later engines require rods with tapered wristpin ends.
Note: Flywheel assemblies supplied with sprocket shaft bearing race installed are compatible with stock roller style sprocket shaft bearings. Assemblies with no race require a Timken sprocket shaft bearing.
V-Twin can provide quality professional machine shop and engine building service through a Motorshop. We can handle any job from fitting a set of pistons in your cylinder to complete rebuild of any engine. Contact your V-Twin customer representative for details.

VT No. 10-0856

V-Twin Motor Shop Twin Cam Flywheel Remanufacturing Services
Flywheel that are out of round or scissored can be repaired. The new flywheels on the 1999-up Big Twin are pressed together, but no match for our V-Twin Motor Shop. We will press apart and disassemble this style wheel assembly, inspect shafts, and crank pin components. V-Twin Motor Shop will rebuild your Twin Cam flywheel assembly to OEM specification using new bearings, crank pin and solid plugs, then balance and true. We can also weld the pin and plugs, if requested, at the flywheel and crank pin interface, for rigid power. We stock the bearings, cages and oversize crank pins to provide you with the components at hand when your flywheel arrives. We will hone the rods to allow the oversize pin to be fitted as required. Flywheel set will be trued and balanced. The final assembly and press is complete in our dedicated TC-88 flywheel fixture assembly.

10-7000

Hydraulic Cam Plate Kit updates the cam chain tension of Twin Cam 88 engine to the latest design. The plate has been designed to allow the installation of the TC 96 hydraulic cam chain tension to TC88 equipped models. This cam chain tension will outlast the spring loaded tensioners and are an addition to the engine modified for improved performance. For use with cam chain tensioner kit.

"Super-Pump" Spring Kit for 1966-99 Big Twin engines. This color coated spring kit ensures that your engine maintains the recommended oil pressure of at least 10 p.s.i. @idle and up to 36 p.s.i.@road speed with a warm engine. Each spring is individually installed in the pressure relief valve of the oil pump. Works in all stock oil pumps as well as S&S and other aftermarket pump.
VT No. 13-9222

Pro Just Adjustable Pressure Relief Cap allows the precise adjustment of oil pressure by turning the adjusting screw clockwise to increase oil pressure or counterclockwise to reduce oil pressure. Comes with a "super pump" spring provided in our spring kit 13-9222. Works in stock 1981-99 oil pumps as well as S&S and other aftermarket oil pumps. Fits 1981-99 without oil vent.
VT No. 12-9921

Oil Screen Kit includes proper plug, screen, O-ring and spring.

Breather Gear

Sifton™ Breather Gear Kit is constructed of precision ground steel with screen installed. 8 piece steel thrust washer set included. Fits 1978-85 BT.

VT No. 12-1540

12-1949

S&S Reed Breather features three steel reeds that are normally in the closed position. The downward cylinder motion increases crankcase pressure to open the reeds. On the upward stroke a vacuum is created.
VT No. 12-1949

Sifton Air Ramp fits S&S/Sifton Breather Gear on 1936-99 models to remove more air and oil from crankcase. Requires removal of screen for installation. Gear not included.
VT No. 12-1945

A

A-Big Twin Steel Breather Valve is a machined breather valve and gear. Designed to replace the stock steel or plastic units. Order 8-piece thrust washers separately. Available in stock duration only with either standard or +.030 oversize outside dimension.

ANDREWS Cam for 1984-99 Evo

For a better street cam for a stock motor, a big lift cam for a dragster or in between, Andrews Products can supply it. All cams are computer designed and precision ground from alloy steel billets.

Andrews Engine Cams for Evo. Evo series cams are designed to maximize Evo motor performance while retaining hydraulic tappets. Both cams offered bolt in with no head work in most cases. Note Shovelhead and V2 cams are not interchangeable.

VT No.	Grind	Timing*	Duration	Lift	Springs	Application
—	Stock 89-91	01/37 53/01	218 232	.495 .495	STOCK	Listed for comparison. 1984-87 cam is 212° intake 202° exhaust .472" lift on both valves.
—	Stock 92-95	-02/30 31/-09	208 202	.472 .472	STOCK	Listed for comparison. 92 cam very close to 84-87 specs. California cams are approximately 178° duration.
10-1171	EV13	15/31 45/13	226 238	.485 .495	STOCK	Bolt-in cam for street or touring with more mid range and upper end power more power than stock EV cam.
10-1123	EV23	10/30 40/8	220 228	.498 .498	STOCK	Bolt-in cam. Crisp throttle response and strong pulling power from 1500 to 6000 RPM.
10-2651	EV3	21/37 43/15	238 238	.495 .495	STOCK	Bolt-in cam for light bikes (FXRS, etc). More mid range power. Idle smoothness unaffected. This is a 6000 RPM cam for stock heads and springs with hydraulic tappets.
10-1180	EV27	20/36 44/16	236 240	.495 .495	STOCK	Bolt-in street cam with fast open and close ramps. Similar timing to EV3 but designed to produce a broad torque band. Pulls 1500-6000.
10-1146	EV46	25/41 49/17	246 246	.495 .495	STOCK	Bolt-in performance with fast open and close ramps. Similar to EV3 but higher static compression pressure for 6000+ RPM with stock heads and hydraulic tappets.
10-1183	EV51	28/44 54/22	252 256	.510 .510	STOCK	Easy installation with longer duration for modified street engines with hydraulic tappets. Power range from 3000-6500 RPM.

***Note:** Timing measured at .053 cam lift.

***Note:** Timing and duration listed for .053 cam lift. ****Note:** Requires S&S Gear Drive

Camshaft for M-8

Andrews M-8 Camshafts Milwaukee 8 bikes are available in both 107 and 114 cubic inch engine sizes. With high efficiency four-valve heads, M-8 engines show great potential for performance gains especially with new design Andrews M-8 series camshafts. Keep in mind, cam timing specs for four valve heads look very different from camshafts designed for two valve applications. Engines with four valve heads have much greater flow efficiency so listed cam timing durations are a lot shorter.

M-8 Components

11-9665

11-9980

M-8 Adjustable Pushrod Conversion Kit includes chrome covers, adjustable pushrod set and o-rings. These pushrods are tapered for enhanced clearance at the cylinder head, allowing the use of higher lift cams. The one-piece chrome moly pushrod adds rigidity and durability and the threaded adjustment feature provides easy cam installation without removing the cylinder heads or rocker boxes.

VT No.	Item
11-9665	Complete Kit
11-9980	Pushrods Only

Andrews M-8 Adjustable Pushrod Set features a tapered end. Set is for use with high lift cams. Fits 2017-up FLT, 2018-up FLST, FXST. **VT No. 11-1208**

M-8 Rocker Arm Tower Stud and Nut Kit. Studs and nuts are heat treated alloy steel and have rolled threads for use on all 2017-up M-8 Engines. Each kit includes eight studs and eight nuts.
VT No. 11-1101

S&S Twin Cam Gear Drive Cams and Camshaft Kits increase valve timing accuracy by eliminating timing chain lash and also reverses the rear cams direction of rotation providing additional operating clearance between cam lobes that will allow higher cam lifts. **Complete Cam Kits** include cams, complete gear drive kit and cam installation kit.
Gear Drive Cams can only be used with gear drive kit and also must be used with adjustable pushrods and performance valve spring kit. **Cams only** include inner gears. Outer cam drive gear kit must be ordered separately. Material must be removed from the inner surface of the stock gear cover and crank case modification is required on .625" and .640 lift cams.

SHOP TIP Piston Installation

Caution: Do not install piston pin without lubricating it first with motor oil or assembly lube. Touch up outer edges of piston pins with emery cloth before installation.
1. Refer to applicable service manual for proper installation methods.
2. Piston should be measured front-to-rear at the base of piston skirt, perpendicular to wrist pin.
3. Piston should be set-up with the following tolerances:
Recommended piston/cylinder running clearances:

	Minimum	Maximum	Preferred
Evolution® Models (Aluminum Cylinders)	.0015	.0022	.002
Big Twin Models (Cast Iron Cylinders)	.0015	.003	.0025
Sportster Models (Cast Iron Cylinders)	.003	.004	.0035

Specifications for ring end-gap are supplied with the ring sets and vary by type and size.
Note: Run engine at moderate speeds for at least 500 miles, avoiding excessive running in lower gears, in order to properly break in new pistons and rings.

Cylinder for 1984-99 Evo

Cylinder and Piston Kits for Evo Late 1985-99 1340 cc are honed and pre-fitted with stock compression cast pistons and Hastings Rings. They are ready to run and will require break-in as suggested in the appropriate shop manual. Sold in pairs for stock stroke only. Order gasket set separately.

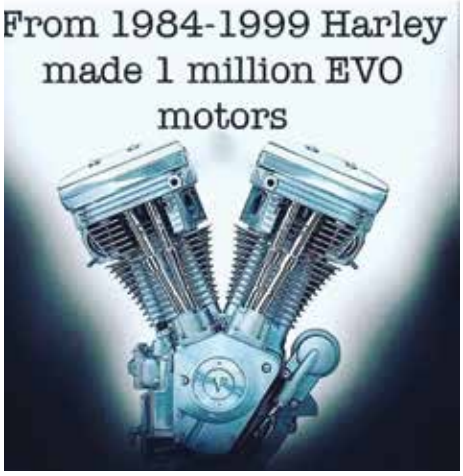
Sifton Cylinder Drain Inner Filter for returning top end oil. Features a stainless steel screen and a ceramic magnet that will stop all ferrous debris from common valve train wear and is most effective in stopping broken valve spring material from entering engines oiling system through cylinder drain. The thin wall steel dowel protects the magnet and provides proper head to cylinder alignment. Fit Evo. **VT No. 40-0250**



1 Cubic Inch = 16.38 cc
1 Cubic Inch = .0163871 liter

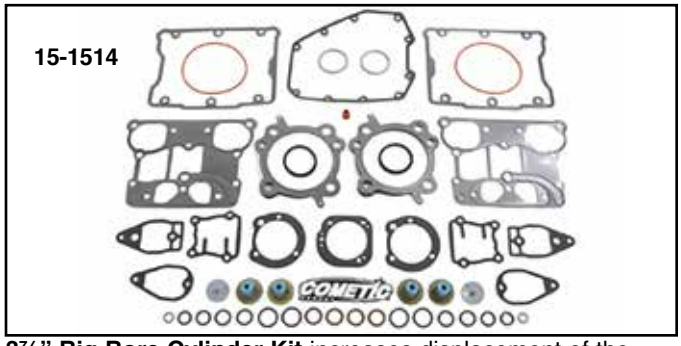
99-17 Big Bore Cylinder Kit for TC-88 or 96



3⅞" Big Bore Cylinder Kit increases displacement of the Twin Cam 96 to 103 cubic inches. Can be used on Twin Cam 96" models to produce 103 cubic inches with stock flywheels. These cylinders require no crankcase machining and are finished and honed. Fits all 2007-11 Twin Cam 96" models with stock stroke flywheels. Can also be used as a stock replacement cylinder set on 2012-17 Twin Cam 103" models includes Wiseco piston kit.

TC Big Bore Kit

11-1421

110”

110" Motorshop 4" Big Bore Bolt-On Cylinder and Piston Kit takes your 96 or 103 cubic inch motor to a full 110 cubic inches without removing the engine from chassis. 4” Big Bore Cylinder and Piston package increases the internal bore from 3⅞” to 4”, without increasing the outside diameter of the cylinder spigot. The cylinder slips into the existing case bore without modification. Kit will add a whooping 7 cubic inches of displacement for more torque throughout the RPM range. This kit includes front and rear cylinder, system-matched pistons with rings. Fits 2007-17 FXST, FLST, FXD, 2007-16 FLT.

11-2216

KB HYPEREUTECTIC PISTONS

KB PERFORMANCE PISTONS

The Keith Black 390 Hypereutectic alloy is cast in a permanent steel mold which makes it possible to build a light weight piston that makes more power and uses less fuel and lasts longer than any other type of piston being made today. We can now forget about running loose, noisy, oil-burning pistons. The low heat transfer of the alloy keeps the skirts cool so piston expansion is minimal. Test engines have run with as little as .0005" (½ thousandth) piston-to-wall clearance. The combination of a low heat transfer piston alloy and high compression ring placement increases power and economy. The high ring placement alone reduces detonation and increases the top ring temperature. It is important to see our ring end gap instructions to avoid ring butting.

The KB piston will make maximum power at 2 to 4 degrees less total timing than conventional pistons. All KB piston sets are supplied with Hastings Moly Ring sets. Safe top ring end gaps can be found by multiplying the bore diameter by the appropriate ring end gap factor from the adjoining chart.

Example: 3.5" bore "Street Normally Aspirated" = 3.5" bore x .0065" = .023" top ring end gap.

Note: Second ring end gaps do not need extra clearance

High Performance Forged Pistons

- Wiseco's high-tech manufacturing ensures greater operating strength and lower expansion at high temperatures
- Evolution Kits include forged pistons with ArmorGlide™ coated skirts, rings, retainer clips and chrome piston pins
- Twin Cam Kit are available with "Armor X" valve pocket coating that also features "Armor Fit" skirt coating or with ArmorPlating which improves ring seal, eliminates ring micro-welding, and improves the piston's ability to defend against detonation damage
- Piston kits are available with X-Ring package (.062 top ring, .062 compression ring and .158 oil ring), or VM-Rings (1.2mm steel, positive twist, gas nitrided top ring, 1.2mm cast iron, taper under-hook scraper ring and 2.0mm three-piece, flex-vent oil ring with steel chrome-faced rails); VM-Rings, X-Rings and XC-Rings will not interchange
- 103" kits require cylinder boring; 110" kit requires big-bore cylinders and case boring; X-Ring package (.0472" top ring, .0472" compression ring and .118" oil ring); recalibration required

Note: Replacement rings include rings for one piston only.

For M-8 Applications

Gary Bang is credited with creating the first motorcycle aftermarket catalogue but his love of motorcycling began in 1948 when his dad bought him a Cushman motor scooter. By 1954 he was working parts at Kolbe Cycle in Reseda, California and in '65 he began traveling as a road rep for MC Supply. He traveled for a few years learning everything there was to know about the industry.

Gary discovered that California was way behind the Midwest in the custom business. Many of the bikes on the floors of those Midwest shops were customized, so in 1967 he found a 1,200 square foot building in Canoga Park, Ca. where his first retail shop was opened. He sold parts for Triumphs and other popular motorcycle brands, specializing in spokes and custom wheel building.

In the early 1970's Gary noticed that the majority of young Harley riders were into chopping and customizing their motorcycles. There was nowhere for these guys to find the product so Gary decided to give them what they wanted. He took out an ad in Big Bike magazine letting everyone know that they could order a Gary Bang Parts catalogue for $1.00. The people finally had a company that had what she or he needed. And if Gary didn't have it, he knew where to find it, or have it made.

In 1982 Gary opened a Harley-Davidson retail store in Atascadero, California where he works with his wife Mary, daughters Kristy and Lisa, and his granddaughter April.

17-0968	1997-16 FLT, 1997-17 FXST, FLST
17-1009	2006-11 FXDWG

M-8

21-0996	Shifter Shaft Arm
21-0988	Shifter Shaft Zinc
21-0997	Shifter Footpeg

This V-Twin part is a steel forging. In this process, the steel is first fired as a red hot ingot. Next a huge air hammer compacts and orients the grain structure into a rough shape of the part. Subsequent hits form the part into its final shape. After which it is machined and heat treated which results in greater strength and resistance to wear. V-Twin supplies many products which are of forged construction, including connecting rods. Frame components and kicker arms.

Billet Shift Arm fits 5 Speed 86-96 ST 85-94 FXR 91-96 FXD Big Twin transmission.
VT No. 17-0666

Shifter Shaft and Bushing Kit

VT No.	Fits

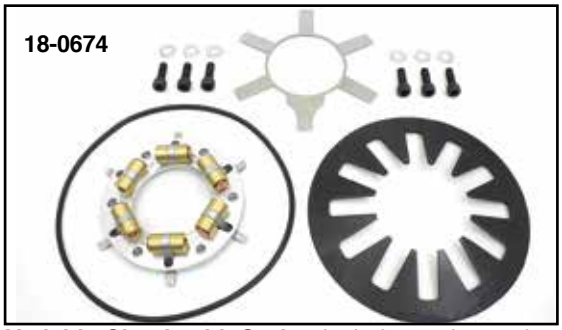
Big Twin Clutch Pack

York Pro-Clutch



Variable Clutch with Spring includes spring and a stronger clutch engagement as revs increase. Fits 1998-17 FXST, 1998-17 FLST, 1998-15 FLT, 1998-2017 FXD. Fits 96" cubic inch.
VT No. 18-0674

York Posilock Clutch Kit fits 1998-06 Big Twin featuring positive engaging ball ramp activation.
VT No. 18-0780

Pro-Lock Clutch Kit features a positive engaging ball ramp activation system, this applies extra pressure to the clutch plates and prevents clutch slippage without any increase on the lever pull effort by changing the fulcrum point. Fits straight into the stock clutch basket and behind the stock primary cover. Replaces stock pressure plate, diaphragm spring and spring retainer. Fits 1998-17 FXST, FLST and 1998-16 FLT.
VT No. 18-0002

BDL Competitor Clutch Kit features 9 springs and shoulder bolts for simple adjustment, large 40mm double row hub bearing, polished pressure plate and Kevlar clutch.

Rear Pulley Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7⁄16” bolts. I.D. is 2 1⁄16” for 1980-99 and 2 1⁄4” for 2000-up.

Motor Sprocket

Compensator Sprocket Eliminator Kit fits 2007-16 FLT and 2007-17 FXST, FLST and FXD models as noted. Solid steel one piece design sprocket kit is spring less and much quieter than stock style compensator. Eliminates the need for a complete compensator assembly. Kit includes washer, spacer, bolt and sprocket.

VT No.	Teeth	Type

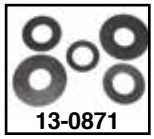
12-1102		Bolt Set
28-0483		Replacement Tensioner Shoe Only for 19-0028

***Note:** Requires shorter primary chain. FLT applications require **VT No. 19-0933** primary chain and FXST, FLST, FXD applications require **VT No. 19-0380** primary chain.

****Note:** Includes **VT No. 19-0933** 84 link primary chain for FLT applications only.

Compensator Bolt Torx Socket is for 2014-up Big Twins. Used to remove or install compensator bolt. **VT No. 16-1669**



Compensator Sprocket Kit. Engineered with heavier springs for increased travel. Heavy duty kit should be used for higher than stock horse power engines.

VT No.	Item	Note	Fits
19-0299	Kit	1&3	2012-13 FXD, FXST, 2011-13 FLT 2009-13 FLHXXX
19-0014	Kit	1&3	As Above
19-0587		1,2,3	As Above
19-0159	Kit		2017-up FLT
12-1105	Hex Nut for Motor Sprocket		

Note 1: Can also be used on 2006-11 FXD, 2007-11 FXST, FLST and 2007-10 FLT but will require the separate purchase of **32-0870** alternator rotor. 2006 FXD models will also require the separate purchase of **32-0868** stator.

Note 2: Requires spring kit **13-0871** for installation.

Note 3: Stock replacement for 2014-17 FXD, FXST, FLST and 2014-16 FLT models.

19-0475

Compensator Sprocket Lock Nut Kit includes a lock plate and lock tabs which secure the nut to the sprocket retainers that the compensator nut and lock plate bolts do not come loose. Similar to the transmission pulley mega nut. Use on all Big Twins with **VT No. 19-0299** or **VT No. 19-0587** compensator sprocket kit only.

Primary Drive Assembly

Primary Chain Drive Systems for Big Twins include 76 or 82 link Diamond primary chain, chain shoe adjuster assembly, clutch drum basket with starter ring gear and steel and fiber clutch plates with pressure plate assembly. Correct front compensator sprocket assembly includes all parts necessary for installation. Including sprocket nut. 5-Speed Big Twin Softail models and all pre1985 FLH-FX 4-Speeds require 82 link primary chains, 1980-up FLT-FXR 5-Speeds require 76 link primary chains.

82 Links	76 Links	Year

Brake Control Kit for FXST

FXST Replica Forward Brake Control for use on all 1970-99 Big Twin with Shovelhead or Evolution engines equipped with hydraulic disc or drum brakes. Designed after the 1984-99 FXST which places the driver peg in back of the brake pedal, so the brake is easier to operate from this comfortable position. Redesigned to accept a Wagner or Kelsey-Hayes style master cylinder or GMA masters, also available with chrome KH or Wagner style masters. Hardware includes linkage pedal mount plate, rubber covered footpeg. This kit is the exact compliment to our shifter kits listed on opposite page and when used with one of these kits, places the pegs in forward and raised position.

Disc Brake Pad Set

Disc Brake Pads available in **Duro** or **SBS brand**. **Duro Brake Disc, Duro Brake Disc Veloprene** for excellent stopping on all types of disc brake discs. **Duro Brake Disc** replacement pads are a soft compound designed to be compatible to all types of brake discs. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel disc brake discs. **Ceramic Pads** are for general purpose use on carbon steel brake discs and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron brake discs. Order anti rattle clips separately. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

Rear Pulley Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7⁄16" bolts. I.D. is 2 1⁄16" for 1980-99 and 2¼" for 2000-up.

Universal Brake Fitting & Bolt

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

Attention!!
These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

Steel Fork Brace.
24-1041, 24-1042, 24-1043, 24-1044 custom front fork braces are made from laser cut 3⁄16" thick steel. They allow removal of the front fender and increases rigidity to the front fork better than stock, eliminating any fork twist while safeguarding the integrity of the suspension. The custom styling looks great on any motorcycle, for use with 19" and 21" wheels and tire. **Not for use with front fender.**

Black	Chrome	Fits	Model

54-0761

2018-up FXSB Lowering Kit is for the single shock units. Includes shock yoke, collar, threaded insert and threaded collar. 5 piece kit. Lowering kit utilizes the original factory FXBB rear shock absorber. Installation will require disassembly of shock and reassembly with components provided in kit. Threaded inserts are stainless steel. The bodies are silver anodized aluminum.

VT No.	Item
54-0761	Lowering Kit
54-0933	Shock

Chrome Billet Shock Sets fit 1989-99 Softail models. Smaller diameter allows more clearance for custom installation.
VT No. 54-0131

11" Chrome Billet Shock Set fits 2000-17 FXST. Features a smaller diameter to allow more room for custom installation. Great for use with an offset transmission. Shocks measure 11" long from center to center of mount holes. **Warning:** Installing a lowering kit or shorter shocks will decrease initial ground clearance. The motorcycle will be lower to the ground and care should be taken to avoid bottoming, especially over bumps or turns. Sold as a pair.
VT No. 54-0175

Emissions and Noise Regulations
Important Information:

Disclaimer: The California Air Resources Board (CARB does not permit the use of aftermarket emission-related parts) that alter the performance of OEM emission-related devices unless CARB has issued an executive order, other than on racing vehicles on closed course. Check your local laws and manufacturer’s information.

Disclaimer: Emission related parts for OEM Non-emission control system equipped motorcycles as well as slip on mufflers that mount downstream of and which do not alter the performance of OEM emission-related devices, are considered legal replacement parts by CARB. More California exhaust information is available a www. arb.aa.gov.

Disclaimer: Aftermarket products, including but not limited to exhausts, fuel, air controllers, air filter kits, camshafts and carburetors and jet kits which alter, modify, or replace emission control devices or systems of an originally compliant highway motorcycle, are not legal for sale or street use in California unless they have been issued a CARB Executive Order. Aftermarket emissions related products which have not been issued an Executive Order or which are not aftermarket Replacement Parts, as defined in Title 13, California Code of Regulations, Section 1900 (b)(2). are authorized for closed circuit race use only. Products shown may be designed, manufactured, intended and sold for closed circuit race use only and use of the same on public roads or lands may be a violation of local, state and/or federal laws. See manufacturer’s information and state and local laws to determine what is authorized for your use on your vehicle.

Disclaimer: Products shown may not conform to federal, state or local noise regulations.

Warranty
Disclaimer: There is no warranty on exhaust pipes and mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, i.e. cam timing, carburetor, etc. and is not caused by defective manufacturing.

Disclaimer: Check your applicable laws and manufacturer’s publication(s) and/or website(s) for manufacturer’s warranty, maintenance, safety, mounting and any regulatory compliance/non-compliance information.

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Drilled Style Exhaust Flange Clamp Set fits all Evo and Twin Cam models.
VT No. 30-0724

Exhaust Taper Valve

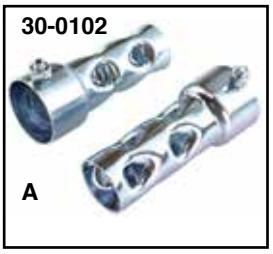
Stainless Exhaust Taper Valves fit into exhaust between pipe and head to put back the low end torque which is lost when large diameter or straight pipes are used. Fit Evolution models with factory or aftermarket pipes and are sold in pairs.

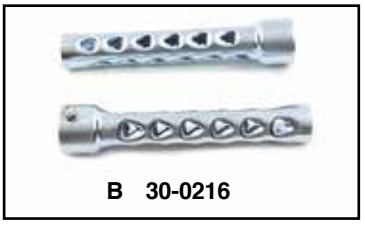
VT No.	Type	Material
30-0113	Machined	Stainless
30-0355	Extruded	Stainless
30-0329	Extruded	Steel

Stainless Steel Taper Valve Kit includes two pure stainless extruded sleeves to fit between pipe and exhaust port, to aid in back pressure when range outside diameter or drag pipes are used. Kit includes solid copper machined exhaust seals which will not restrict gas flow.
VT No. 30-0119

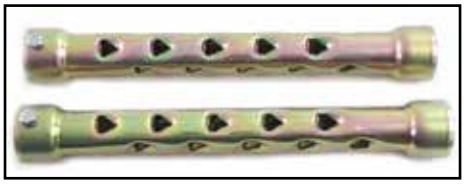
Baffle

Note: Baffle size denotes size of pipe into which it fits.





30-1403



Pipe Baffles fit inside straight pipes. Sold in pairs. **Note:** Baffle size denotes size of pipe into which it fits.

VT No.	#	Size	Length
30-0102	A	1¾”	4”
30-0103	A	2”	4”
30-0216	B	1¾”	8”

31-1285		Front	Black	1984-94 FXR

Touring Torque Linkage System features a chrome finish and will fit all Touring models with no modifications necessary to install unit. This unit will eliminate the lateral movement while still allowing the Iso mounted factory design of the "floating" drive train to move vertically as designed through connecting the rear of the transmission case to the frame. Kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration. Fits 1993-2008 FLT.
VT No. 51-1602

V-Fire Single Fire Coils features 45 kv with 1 spark for each cylinder as fired and will mount to stock bracket and accept stock type coil covers. Works with most aftermarket single fire ignition systems.

VT No.	Finish
32-0467	Black
32-0474	Chrome

1. 12 volt wire from ignition switch is connected to center post along with red wire from ignition.
2. Connect the black wire to outer post from front cylinder.
3. Connect the white wire to other outer post for rear cylinder.

45 KV Coil Kit includes coil and cover. To mount on stock 1984-99 Softail .
VT No. 32-0749

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke. This is the way the stock motor works on pre TC-88 engine.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

ACCEL Ignition Coils

Accel Dual Fire H.V. Super Coil. High performance bolt on for electronic ignition systems. High-tech molding for exact fit on 1965-99. 2.3 ohms.
VT No. 32-7772

The Accel Stealth Coil eliminates the need for ignition wires forever by mounting the coils directly to the spark plugs for maximum spark energy to the plugs. An aluminum finned cover holds the coil in place and acts as a functional heat sink to pull heat away from the cylinder heads. All wiring is hidden in the fins of the head for a clean, custom look. Available with natural finned heat sink.

VT No.	Fits
32-1141	2002-08 All FLT models with EFI
32-1142	2001-14 All Softail models with EFI
	2009-14 All FLT models with EFI

Accel 8mm S/S Spiral Core Ignition Wire Set
- Designed specifically for Harley-Davidson Milwaukee 8, Twin Cam
- Delivers up to 5 times more peak energy than other "Performance Wires"
- Maximum RFI protection to shield sensitive electronics with 500 Ohms per foot
- Spiral core wire utilizes stainless steel alloy conductor with fiberglass/Kevlar inner core for strength
- Lower resistance delivers more energy to the spark plug
- Custom fit sets are ready to install-no cutting or crimping required
- Fully capable with Delphi fuel injection system

Carb Ignition Advance Unit

"Tuneable" Ignition Advance Assembly includes stainless advance base, points plate with "Blue Streak" points and condenser with hardware and 3 pairs of color coated springs which allow full advance at 1400, 2000 and 2600 RPM depending on which spring is selected.
VT No. 32-0713

Advance Unit features machined stainless steel shaft and plate, metallic coated weights and special wound springs for exact advance. For 1970-84, mechanical advance applications. Center screw included.
VT No. 32-9037

Tuneable Advance Unit features stainless base, heat treated weights cam bolt and 3 different color coded spring sets which allows full advance at 1400, 2000, and 2600 RPM depending on which springs are selected. Can be used with all ignitions, points, single or dual fire types which utilize an advance unit. Springs also available separately.

Warranty
All Electrical Components sold as individual pieces or in kits are covered under our warranty "Replacement Only" Provision. All electrical related item part numbers begin with a 32 prefix. No credit will be issued for these items as they are exchange only.

Points Conversion Kit. Both brands include everything necessary for direct replacement on 1970-78 Big Twin, 1971-78 Sportsters or for converting late model electronic-type back to points. Accel type available with microchip points, which will require a domed shaped points cover such as VT No. 42-0299 to accommodate taller points. The V-Twin unit includes stock style points and condenser. 32-0150 available with needle bearing weights.

V-Fire Ignition Kits are available in ***dual fire*** where there are two sparks at the same time and ***single fire*** where there is one spark for each cylinder when it is fired, separately. Each kit includes a mechanical advance unit and all hardware. Order coil separately VT No. 32-0467 coil has two separate coils inside to fire independently.

Kits	Type
32-1620	Dual Fire
32-1626	Single Fire

VT No.	Type	Coil
32-0468	Dual Fire	**32-0511**
32-0469	Single Fire	**32-0467**

V-Fire Single Fire Coil gives one spark for each cylinder as fired and will mount to stock bracket and accept stock coil cover.

VT No.	Finish
32-0467	Black
32-0474	Chrome

Accel Late Model Super Coil for late model Twins with carburetor. Features faster rise time, higher voltage, maximum spark and energy to spark plugs for quicker starting, improved idle and crisper throttle response. Fits in OEM location and is available in black finish. Fits 2000-02 FXST-FLST, 2000-05 FXD, 2002-06 FLT with carburetor.
VT No. 32-1810

Dyna Ignition Booster is for single points systems only. It transforms inconsistent electrical surges into controlled bursts of energy so that the coil power is not wasted. **VT No. 32-7787**

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Ignition

Dyna 2000 Digital Ignition System include Dyna 2000 HD-1 Ignition Module and a matched Dyna Twin Fire Coil for each application. Fits 1996-99 FXST, FLST, 1996-98 FXD, L94-98 FLT
VT No. 32-0802 SFK-3

32-9113

Dyna 2000 Ignition Modules Replacement can be used with stock electronic ignition.
Note: The stock ignition consist of a sensor plate and rotating cup. The 2000 will work on all 1970-up models but requires the 1983-up type ignition cup and sensor plate. The 2000 Advance curves will not work properly if installed with the pre1983 ignition cup and sensor. Dyna 2000 HD-1 can be used with both single fire (separate coils) or Dual fire (Single Coil). The Dyna 2000 HD-2 can be used as dual fire only. **Both units** feature programmable advance curves,rev limiter and LED diagnostic lamp for easy static timing and plugs into stock harness and bolts to stock module location. Also available with USB port that will allow mechanics or tuners more advanced programming but requires separate purchase of Dyna Programming kit. **Note:** Can only be used with suppression spark plug wires. On 1984-90 models Dyna extension harness must also be used.

VT No.	Item/Plug	Years

32-9285

32-9264

Dyna	Application
DC6-5	All FXR-FXST and Dynaglide models
DC6-4	Dual Spark Plug Head Application

Dyna Twin Fire Ignition Coils are designed to work with Dyna 2000 HD-I ignition modules. Twin fire coils are slightly larger than stock coils and fit the stock mounting bracket. Twin fire coils can be used with any electric advance ignition system that incorporates dwell control except Dyna DS6-2 or similar type ignitions.

VT No.	Dyna	Ohms/Type
32-9285	DC6-5	3 (A)Twin Fire II Miniature Dual Output Towers, Replaces DC6-3
32-9264	DC6-4	3 (B) Four output towers Fits Dual Spark Plug

32-9500

32-9503

V Fire Ignition Systems fit all 1970-98 carbureted models and requires sensor cup for 1982 and earlier applications. Order tach interface, sensor cup and screw separately if required.
Note: Order Coils As Required.

VT No.	Fits
32-9500	Single Fire Ignition fits Evolution, Shovel and Sportster through 1997. It can be set for Street or Race-Electric or Kick Starter includes rear cylinder timing adjustment for rate of advance. Compatible with single fire coils.
32-9503	Single Fire Ignition Kit fits As Above Includes coil, 8.5mm wires & sensor cup
32-0588	8.5mm Wire Set

Notes for installation:
32-9500
Red = Positive (coil)
Black = Negative (front cylinder coil)
White = Negative (rear cylinder coil)
Green = Voes (vacuum switch)
Brown = Tach

Unilite Breakerless Ignition System for all 1970-99 Twins. Unilite Dual fire module features integrated photo coupler, signal processor and power switch. Requires mechanical advance assembly and ignition coil with 3.0 to 4.0 ohms.

VT No.	Item
32-5119	Ignition System
32-7510	Mechanical Advance

32-1732

VT No.	Item
32-1731	HI-4N Ignition
32-1732	HI-4N Kit

S&S H1-4N Multi Function Performance Ignition features one piece machined aluminum housing, BCD switches with solid detent and legible markings, which allows easy adjustments of mode. Advance rate and rev limit, single or dual fire operation and initial timing marks that allows precise adjustment. Fits 1970-99 XL. Also available as an ignition kit which includes HI-4N ignition, single fire coil and 8.5 mm plug wire set.

32-0086

Ignition Module Adapter allows use of seven pin module (1991-93) going to eight-pin Deutsch (1994-99) wiring harness or an eight pin module going to a seven pin harness. Cannot be used on electronic fuel injected models.
VT No. 32-0086

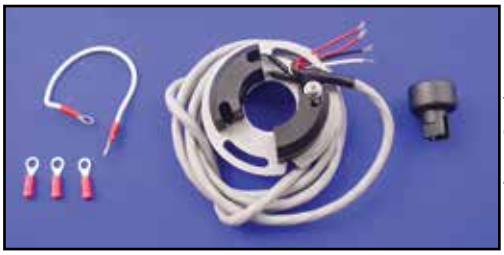
32-9130

Ignition Timer Sensor Cup Kit
VT No. 32-9130

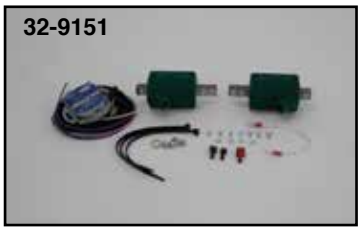
Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

DYNA Ignition

Dyna 'S' Hi-Performance Ignition System is self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer, so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. **Note:** For dual plugged heads, on 1980-up use advance mechanism, VT No. 32-7510
VT No. 32-7778 (DS6-1)



Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.
VT No. 32-7777 (DS6-2)



Dyna 2000i Digital Ignition available as a module only or complete kits that include correct coil. Features include single or dual fire operation, 8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows the mechanic or tuner the ability to fine tune 2000I Ignition but requires adapter.

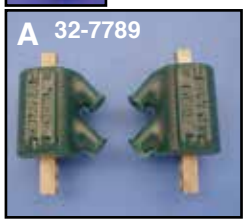
VT No.	Item	Plug	Fire	Coil
32-9151	Kit	Single	Single	DC3-1
32-9152	Kit	Dual	Single	DC1-1
32-9155	Kit	Single	Single	DC6-5
32-9159	Module Only			
32-9087	Sensor Cup			
32-9052	Cup Screw, 10 pack			
32-9130	Ignition Timer Sensor Cup Kit			

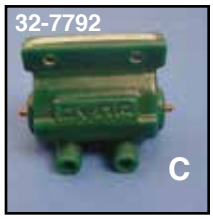
Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

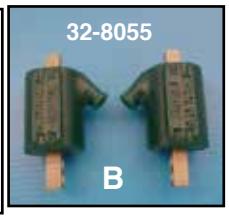
VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire

Replacement Rotor for Dyna Ignitions.

VT No.	Fits
32-9300	DS-6-1
32-9301	DS-6-2







K.V. Recommends the following coils for Dyna Ignitions:
DS6-1 Ignition VT No. 32-7778
Street, Single plugs use DC-7 or DC-8
Race, Single plugs use DC-1 or DC-6
Street/Race Dual plugs use 2 DC-2 or DC-5, wired in series
DS6-2 Ignition VT No. 32-7777
Race, Single plugs use 2 DC-3
Street, Dual plugs use 2 DC-7 or DC-8
Race, Dual plugs use 2 DC-1 or 2 DC-6
Street, Single plug uses 2 DC10-1

Dyna Coils generate 35,000 volts and work with all points ignitions as well as aftermarket or factory electronic ignitions. Note: 32-7792 is electronic, 32-7793 is for points ignition.

VT No.	#	Volt	Ohm	Dyna	Type	U/M
32-7789	A	12V	3	DC-1	Angle, Dual	Pair
32-7790	A	6V	1 1/2	DC-2	Angle, Dual	Pair
Use 2 for dual plug heads						
32-7792	C	12V	3	DC-6	Stock, Dual	Each
32-7793*	C	12V	5	DC-7	Stock, Dual	Each
32-8055	B	12V	3	DC-3	Angle, Single	Pair
32-8086	A	12V	5	DC-8	Angle, Dual	Pair
32-9035	B	12V	5	DC-10-1	Angle, Single	Pair

***Note:** Use two for single fire ignition.

Dyna Electric Tachometer Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twins when electric tachometer is used.
VT No. 32-7799

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Daytona Twin Tec Carb Ignition

32-3015

Daytona Twin Tec Internal Ignition Kit has a billet aluminum housing with wide timing advance adjustment range which accommodates stock to highly modified engines. Kit includes ignition, coil and spark plug wire set.

VT No.	Fits

Dyna Tek

Power Commander V Fuel and Ignition Timing Control for each cylinder. Rev Xtend feature increases stock rev limiter. Switch between two maps "sent on the fly" can be adjusted on a "per gear" basis and allows for one map per cylinder per gear if required. Adjustment of fuel and timing is based on engine temperature provided by the cold start feature. Will power up with USB cable only for programming. **Note:** Not legal for use on pollution controlled vehicles.

VT No.	Fits
32-0843	2009-11 FLSTC/FLSTN (plastic mount tray included)
32-1039	2012 FXST, FLST
32-1043	2012 FXD

Power Commander III USB Engine Management Systems are for fuel injected models and allow for both fuel and ignition adjustments. Each unit includes a specific map, designed to improve performance over stock. The Power Commander includes IBM com32patible link cable and software package which allows you to fully map the fuel ignition curves on IBM compatible computers. If a computer is not available, the fuel curves can be adjusted by using three touch buttons on the face plate.

Dyna Tek FI Controller is a plug module that offers 3 user selectable base fuel curves that are designed to improve engine operation and can be modified to suit a wide variety of modifications. Fuel mixture can be enriched or leaned as required. The Dyna FI controller uses the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications required to the stock ECU and removing the Dyna. FI controller returns the vehicle to the factory configuration.

32-3044

32-3050

Twin Tuner II features all the same function as the original Twin Tuner and includes ignition timing control capability. Requires optional USB interface cable VT No. 32-3045 compatible with Twin Scan II Tuning Aid VT No. 16-0378.
VT No. **Fits**
32-3042 2001-2011 FXST, FLST, FXD with 36 pin Delphi
32-3043 2012-up FXST, FLST, FXE with CAN Data Bus.
32-3044 2008-13 FLT with 73 pin Delphi
32-3050 2014-up FLT w/ CAN Bus.
32-3045 Optional USB Interface Cable

Daytona Twin Tec TCFI Gen 4 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin Delphi controller with J1850 data bus.
Fits 2001-11 FXST, FLST, FXD, FLT ***Note:** Not legal for sale or use on pollution controlled vehicles. **VT No. 32-7400**

TBW System

Note: CAN bus system
For Harley-Davidson models, pre-2011, 2012 use analog signal, 2012-up using digital signal. CAN bus system is based on the digital signal. Analog signal runs by wire, so each commands need wire to connect. For digital signals, each command goes to ECM, and ECM gives the proper reaction. This is the basic idea, the real situation is more complicated.

Some basic factoids about **3 Phase**...Most of the electric power in the world is **3 Phase**. The concept was originally conceived by Nikola Tesla and was proven that 3 Phase was far superior to single phase power. **3 Phase** power is typically 150% more efficient than single phase in the same power range. In a single phase unit the power falls to zero three times during each cycle in **3 Phase** it never drops to zero. The power deliver to the load is the same at any instant. Also, in **3 Phase** the conductors need only be 75% the size of conductors for single phase for the same power output. Therefore, a **3 Phase** system provides more current delivery for EFI and other electrical accessories and provides more charging power for increased battery life and easier starting. Not really much more complicated than single phase but much more efficient!

Alternator Kit features rotor, stator and regulator and bracket.

Extreme Duty Battery Cable Sets. These #2 gauge wires are very fat and flexible. The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket. Sealed and insulated with black heat shrink tubing means no moisture will get in these cables.

Battery Cable Set

Four gauge battery cable set features a black finish with tinned copper strands. Sold as a set of 2 cables. Includes extra red shrink tubing and features 1/4" and 5/16" terminals.

40-0246	With bracket

Sifton Universal Breather Vent Canister is a one way check valve; includes line and clamps. Non serviceable unit.
VT No. 40-0445

Crank Vent features replaceable umbrella valve.

VT No.	Item
40-0875	Canister with one Umbrella Valve
14-0925	Umbrella Valve (10 pack)

Stainless Hose Clamps are available in Worm Gear type, Nickel Spring type, Torro drive type. Torro drive clamps feature pressed tooth and raised band edges to prevent damage to hose. Available in two sizes and sold in packs.

Stainless Worm Gear	Nickel Spring	Size	Line
35-0442	35-8036	¼"	Fuel
35-1442	—	7⁄32"- ⅝"	Phillips screw
35-0413	—	7⁄32"- ⅝"	Fuel
35-8031	—	⅝"	Oil
—	35-8037	5⁄16"	Oil
—	35-8038	⅜"	Oil

Engine Breather Oil Collector designed to collect the oil mist from breather hose which eliminates engine oil from collecting in air cleaner. Features a high flow air filter which acts as a internal oil baffle allowing the oil and air to separate more efficiently by promoting unrestricted breathing. The air filter can easily be cleaned. A 90° barbed fitting fits breather hoses perfectly. On the bottom is a drain plug to allow drainage on a regular basis. Measures 5⅜" x 1½" and includes mounting clamp.

VT No.	Item
40-0595	Chrome
40-0568	Polished
40-0447	Replacement Filter

Breather Oil Collector Can includes chrome clamp. Order filter separately.
VT No. 40-0652

Chrome Crankcase Breathers available to accept hose or ⅛" NPT fitting.

VT No.	Type
40-0434	⅜"
40-0447	⅛" NPT

Chrome Vented Breather Canister accepts ⅛" NPT fittings, not included.

VT No.	Item
40-0457	Breather
40-0449	Banjo Tube Kit
40-0450	Straight Tube Only

Uni Filter Crankcase Breather is plastic construction with a zip tie loop for attachment and is washable for reuse.

VT No.	Size
40-0355	5⁄16"
40-0354	⅜"

Internal Throttle

Wyatt Internal Throttle Sleeve. Custom design allows pull action of throttle cable for use with billet grips.
VT No. 36-0570

1. Cut 2⅜” off end of handlebar. Remove end of throttle handle that would attach to throttle cables.

2. Mark handlebar for inner throttle sleeve. Drill a hole for the set screw, this will hold throttle on the handlebar.

3. Remove set screw from the outer sleeve of spiral. Slide grip on and mark end of grip on the handlebar. Measure from this mark back to set screw in outer sleeve. This measurement will be used to mark and drill the throttle grip. Once drilled install grip. Use a small amount of Loctite® on set screw for final installation.

4. **Note:** Set Screw (A) should not be tightened so as to make contact with handlebar as it will prevent throttle from turning.

Internal Throttle/Clutch Unit features ball and needle bearing construction with built in return spring.
VT No. 36-0789

Twist Grip Kit with cables features the push-pull type for Keihin butterfly and CV type carburetors. Includes 2 stock length black cables and twist throttle and grip set.

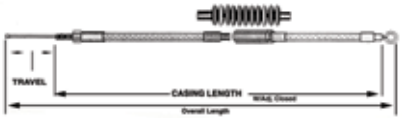
Full Stainless Braid Covering with Clear Coat

Cables are constructed with the Supra™ stainless steel braid which is tightly woven for a bright, quality consistent finish. The clear coat is UV resistant, heat bonded, non-yellowing grade for a long service life. All applications include the correct fittings, adjuster & inner lengths for an exact installation and fit.

TWO-PIECE CLUTCH CABLES



Clutch Cables feature heavy duty construction designed for reliability and longer service. By V-Twin in black vinyl or braided stainless covering.

Clutch Cables feature heavy duty construction designed for reliability and longer service. By V-Twin in black vinyl or braided stainless covering.

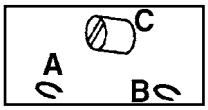
Quick Connect Upper Clutch Cables economically replace the OE upper cable section on select models. Easily and quickly connects to the existing over cable section. Significantly reduces installation time, plus there's no need to drain transmission fluid. Unique design reuses OE cover and housing parts. Low effort, high efficiency cable design meets or exceeds OE specification for fitment construction and endurance.

Cable



Throttle Idle Clips, Cable Retaining Clips & Ferrules. Sold in 10 pack.

Tank with dash cut out requires purchase of complete dash kit.1996-05 FXD models require purchase of VT No. 39-0124 Speedometer Adapter to reuse existing speedometer in a bobbed dash. Tank will accept stock dash from 1991-96 FXDWG. Smooth tank fits 1991-05 all FXD-FXDWG.
VT No. 38-0123

Gas Tank 2" Lift Kit VT No. 38-0855

Important Gas Tank Information: All tanks are shipped unpainted unless otherwise noted. Caps and petcocks are not included. Carefully check the new tank for flaws and fit before painting. **Do not grind or sand the seams or joints**. Clean the inside of the tank and it is suggested to pressure test and use a tank sealer. Check petcock openings, making sure the petcock can be easily installed. Use proper hardware to mount tank, including the bushings, brackets and spacers required for assembly. Tedd Cycle, Inc. is not liable for paint work or labor claims of any kind. Tedd Cycle, Inc. is not the manufacturer of the gas tanks.

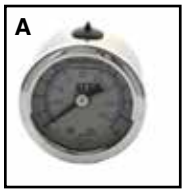
Oil Gauge



Liquid Filled 1½" Oil Pressure Gauges feature a weather resistant sealed lens, stainless steel case, chrome rim and extra heavy mechanism. The liquid filled face eliminates needle bounce giving a constant reading. All gauges have ⅛" NPT male rear fitting.

Chrome Oil Gauge Cover is machined of alloy, with square hole in bottom.
VT No. 40-0448

Developed by Marty MacCollum, USA Racing 1987

Sifton Oil Pre-Filters are constructed of machined alloy with a #40 mesh screen installed to trap large debris and a circular magnetic collar to collect the ultra fine ferrous particles before they reach the engine. Unit can be installed in the following locations for ⅜" inner diameter oil line:

- Supply line before the engine on all models
- Primary scavenger return line on Early FLH and FX models
- Return line to oil tank on FL-EL-UL and models without a factory filter
- External oil return on high performance heads.
- Any pressure supply or return (use the prelifter with the ⅛" NPT body).

The ½" unit recommended for Softail TC-88 models on the path between the cam bearing housing and oil pump.

VT No.	Type	Hose

Die Cast Primary Covers are manufactured from a casting process. It is the nature of parts produced from this process to have small random subsurface imperfections that can be uncovered during the polishing process. These may appear as very small cosmetic imperfections after chrome plating. We also do not polish in areas that are not readily visible once assembled on the motorcycle or by polishing machines such as small depressions or tight corners. As these conditions are common in polished and chrome-plated castings, a reasonable standard of acceptability has been established to bring you the highest quality product at an affordable price. This part meets Perma Chrome™ cosmetic standard. The aforementioned cosmetic conditions are considered reasonable for this part and are not considered warrantable.

Outer Primary

Note: Big Twin Outer Primary Covers are from new die cast tooling to replace stock parts. Kits include chrome primary cover, chrome allen screws, outer cover starter bearing and gaskets for derby, inspection and outer covers. All other covers are sold as cover only.

Outer Primary Cover for M-8, 2017-up FLT, flat black finish.

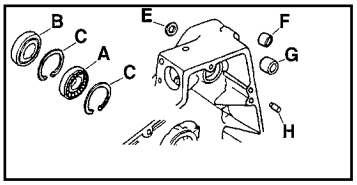
Chrome 3-D Derby Cover features concealed mounting by use of plate which installs like a derby cover. The 3-D spinner cover mounts to stud on plate and held firmly in place by O-ring. The red backing plate can be painted to match color scheme. **VT No. 42-0108**

Primary Hardware

Late 1984-17 Big Twin Inner Primary Bearing supports transmission mainshaft at inner primary area. Available in OEM floating style roller bearing *Type (B)* which requires purchase of the inner sleeve, 17-9941. *Type (A)* is the double sealed ball bearing style which does not require the sleeve.

VT No.	Type
12-9935	Sealed Ball Bearing (A)
12-0357	Stock Roller Bearing (B)
12-1279	Bearing Only, 2007-17 (B)
17-9941	1984-05 Sleeve

Stepped Inner Primary Bearing Race for all 1991-05 Big Twins features an extra step on the inside diameter that acts as a stop on the transmission mainshaft. When the race is pressed on the shaft the step will not allow the race to move inward toward mainshaft seal.
VT No. 17-0465



Late 1984-06 Inner Primary Hardware fits Big Twin 5 Speed FXST-FLST.

Wheel Assemblies

Rear Wheel Assemblies for left hand drive with 2000-up hub for Softail models tube type or tubeless application. Wheels have extension on pulley side to minimize pulley spacers and bearing is moved outboard to prevent bent axles. Rear wheels accept 11½” disc rotors. Single flange are for right side drive. The 1984-99 hub types use Timken bearings and the 2000-up hub types use sealed bearings without ABS. 1” axle size.

42-0147

Mid-Frame Dyna Deflector
Improve rider comfort during the summer riding season. Designed for severe duty and extreme temperature applications, these conspicuous deflectors attach to the frame and surround the top of the rear cylinder head. The scoop shape captures the moving air and uses the flow to direct the heat down and away from rider to improve comfort. Kit includes all required mounting hardware. Fits 2006-17 Dyna, 06-11 require the removal of the original equipment coil cover. **VT No. 42-0147**

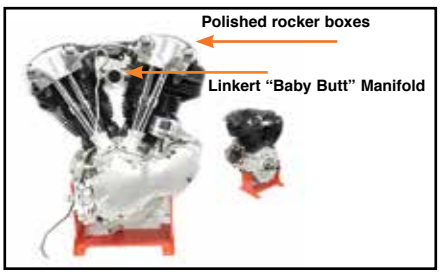
Replica Knucklehead Long Block is fitted with V-Twin Mfg.'s replica exhaust system produced with our world exclusive tooling and fixtures.

Replica 74" Long Block Knucklehead with natural rocker boxes, parkerized valve cover cups and a Linkert 4-bolt manifold. See web for details.
VT No. 10-1377

Over 500 Long Blocks Sold!



Replica 74" Long Block Knucklehead
- Features polished rocker boxes, parkerized valve cover cups and a Linkert "baby butt" manifold.
- Fully assembled and tested for oil pressure.
- Includes the motor sprocket and 18mm spark plug set. **VT No. 10-1393**

Replica V-Twin™ Mfg. Knucklehead Long Block
- Shipped fully assembled less carburetor and generator and shop tested for oil pressure.

Components used in the assembly include:
- **Crank Case Replica V-Twin Mfg.** with authentic cast profiles. Including relay and number bosses.
- **Rocker Boxes** with natural finish and overhead oiler provision from timing cover.
- **Heads** newly casted Knuckleheads with parkerized lower valve cover cups and tops.
- **Flywheels** are cast iron type, assembled with stock rods and Torrington rollers with steel cages at sprocket and pinion shaft ends.
- **Valve Train** includes solid tappet assemblies with Sifton lightning cam, Sifton solid stock pushrods and chrome pushrod covers.
- **Cast Iron Cylinders** fitted with 8.5:1 cast pistons and Hastings rings
- **Oil Pump V-Twin Replica** cast iron with early iron cover
- **Distributor mechanical advance** with corresponding relay mount with distributor post guide slot
- **Intake Manifold** Linkert style 4 bolt manifold with plumber style nuts and brass seals.

Flywheel Assembly with 4⅝” stroker is for 1973-84 Big Twins. These flywheels are machined from heat treated steel forgings which makes them structurally superior to cast iron designs. Flywheels are assembled with heavy duty rod set, trued and balanced for pistons listed. Piston sets must be ordered separately.
VT No. 10-0038

Replica Flywheel Sets feature cast construction to accept OE style components.

Big Twin Oil Pump Assembly

Sifton™ Oil Pump Assembly features improved oil pump pressure regulation that will ensure correct oiling to all areas of Big Twin engines. This pump kit includes all necessary fittings, snap rings, keys, gaskets and mounting bolts. Can be used on either chain drive or belt drive models. **Note:** On 1970-80 models a drilling operation is required, use **VT No. 16-0986** drill fixture. Available with breather gear kit. Oil pump kits with breather include drive gear, breather gear and washers, uses S&S style gaskets.

S&S Complete Oil Pump Assemblies with billet bodies. Include all internal gears and shafts for years listed. Also available as complete kits that include drive shaft gear, pinion shaft gear and breather gear kit.

Oil Pump Assembly

VT No.	Years
12-8001	1936-72
12-8002	1973-91

Oil Pump Kits with Breather Assembly

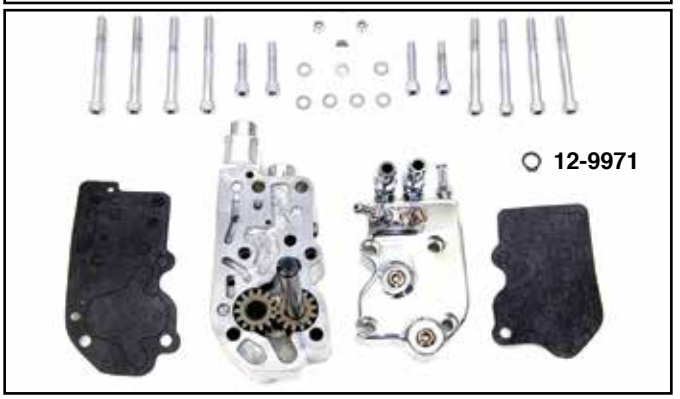
12-8008 1973-91

S&S Oil Pump Gasket and Master Rebuild Kits are available with paper or mylar gaskets. Gasket kits include inner and outer gaskets, drive shaft key and snap ring. Master rebuild kits include seal, snap rings, springs, ball, inner and outer gasket, O-rings, and keys.

Gasket Kit	Master Rebuild Kit	Type	Year
15-0657	—	Mylar	1936-91
15-0658	**15-0361**	Paper	1936-91
15-0362	**15-0364**	Mylar	1992-99

Note: S&S Oil Pumps are machined for two basic groups 1936-72 and 1973-91. Installations on engines from 1936-1969 and 1981-91 are strictly bolt on and require no modifications. Engines from 1970-80 require a simple drilling step and engines from 1970-72 require a plugging step. Both steps can be performed while the engine is still in the chassis. All 1973-76 applications require 1977-up diameter pinion and cam gears.

Rear Chain Oiler Fitting fits 1941-69 FL, zinc. Fitting is positioned between the oil pressure gauge and oil pump fitting. **VT No. 12-1280**



Oil Pump Assembly for Big Twins is high-quality replacement cast aluminum pump body with steel gears and shafts. Features cast aluminum finish. Gaskets and seals included. Mount hardware sold separately. **Note:** 1973-80 models may require drilling of crank case use drill jig **VT No. 16-0986.**

VT No.	Fits
12-8011	1992-99 Evo
12-8012	1973-91 FX-FX

Oil Pump Fitting Kit fits 1968-84 Big Twin models. **VT No. 40-0561**

Chrome Oil Pump Cover mounts onto the existing bolts on 1970-84 Big Twin models with chain oiler fitting.
VT No. 42-0041

Pushrod Adjustment Screw Set fits 1957-85 BT. 4 pack.
VT No. 12-1196

Sifton Soft Touch Tappet Kit for 1971-14 FX and 1966-84 FL.
VT No. 11-1280

Taper Lite Adjustable Pushrod Set f 1966-84 are manufactured from 4130 steel. Use with stock hydraulic lifters.
VT No. 11-9704

Solid Pushrod Conversion fit 1966-84 Shovelheads. We put the adjuster into the lifter body to increase the stability of the pushrod at greater angles. A tapered split lock nut is used for the best way to lock the adjusting bolt into the lifter body. We use a 5⁄16 -32 extra fine thread for easier and close adjustments. Pushrods are long enough to accommodate engines with stroker cylinders. Alloy pushrods have hardened steel tips.
VT No. 11-9535

Solid Tappet Kits for 1966-84 Shovelhead are made from aircraft quality 4130 seamless chromoly tubing. Each set includes 4 pushrods and 4 adjustable solid lifter adapters. Smaller diameter than most moly pushrod sets for clearance in pushrod cover tubes. Instructions included. Fit stock or .200 longer stroker cylinders.
VT No. 11-9545

Replacement Nuts fit each brand of pushrods or tappets.

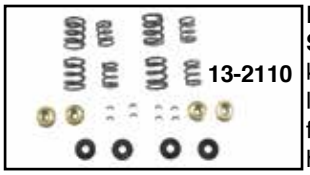
Valve Spring



13-2110

Kibblewhite Lightweight Valve Spring Kits include springs, keepers, upper retainer, and steel lower collars. Note: 13-2115 are for use with valve guides that have a .625 top O.D.

74" and 80" Shovelhead, 1966-84

VT No.	Type
13-2110	Has 160 lb seat pressure, up to .600" valve travel. Hard-anodized aluminum upper retainers. Use on 1966-E79.
13-2115	Has 160 lb seat pressure up to .600" valve travel. Steel upper retainers. Uses on L1979-84.

11-2020

Kibblewhite Valve Spring Retainers and Keeper Sets. Keepers are CNC machined and then heat treated.

Keeper Set

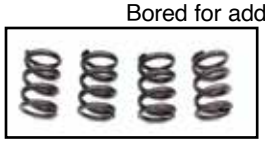
11-2021 Pan/Shovelhead

Upper Retainer Sets

11-2020 Pan/Shovel Titanium Offset 0.070" to allow more installed spring height.

11-4248 Pan/Shovel Aluminum Offset 0.070" to allow more installed spring height.

11-2022 Lower collar set. Pan/Shovelhead machined to work with .562" diameter guide seals and counter Bored for added clearance.



Kibblewhite Big Twin Valve Spring Set for high lift cams can be used with stock retainers and lower collars for up to .600" lift. Fits 1948-84.
VT No. 13-2000

Valve Spring

MANLEY

Manley 1948-79 Valve Spring Kits 74 and 80 FL-FX .495 Lift Kits except Evo

VT No.	Collars Top	Combined Loads	Coil Bind	Recommended Cam Lift
11-9229	Titanium	140 @ 1.480 300 @ 1.000	.950	Stock-.500"

The above ".495" lift kits do not require cylinder head machining for installation. These kits are supplied with lower collars that allow additional spring travel as compared to stock collar and provides these kits the ability to accept camshafts up to .495" lift. Note: 11-9229 is for stock stem diameter valves.

Manley Valve Kits.
74 and 80 FL-FX .500"-.600" Lift Kit except Evo

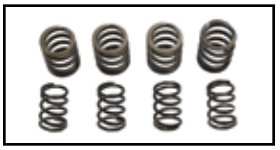
VT No.	Combined Loads	Coil Bind	Recommended Cam Lift
11-9612	180 @ 1.600 320 @ 1.100 360 @ 1.000	.930	.500-.600

The above kit features tri-spring (outer-intermediate-inner) interference fit to reduce harmonics and control spring surge. Additional machining is required to lower the height of the valve guide to avoid interference with the top collar. Springs have more pressure than stock but can be used with .500" lift or .600" lift cams. Includes titanium top collars.

74 and 80 FL-FX .465" Lift Kit except Evo

VT No.	Combined Loads	Coil Bind	Recommended Cam Lift
11-9613	150 @ 1.450 300 @ 1.000	.950	Stock .465

The above kit does not require machining for installation. However, do not exceed .465 lift due to the potentially high stress on the springs. The springs are interference fit to help the harmonics. Supplied with steel top collars. Use with stock stem diameter valves only.



Sifton Valve Spring Kits feature four double matched competition springs. Fits 1941-84 FX-FL, order top colored collars separately from this page. Mfg# 3030.
VT No. 11-9618

Valve and Spring Kit by Sifton for Shovelheads includes two intake and two exhaust valves with nitrated finish, complete spring set and keepers with upper and lower collars. Four piece valve set available separately.

VT No.	Year	Item
11-0794	1966-79	Kit

Valves by Precision Machining (Kibblewhite). Intake valves are made of 8645 heat treated valve steel and the exhaust valves are made of 21-2N heat treated non-magnetic stainless steel. These valves are available with the following stems and heads:

(1) **Racing by Kibblewhite Precision Machining** feature a sharper profile angle to maximize flow, 11-6015 has 2.00 head, 11-6016 has 1.812 head, 11-6017 has 1.780 head.

(2) **Black Diamond:** One piece stainless steel valve with a stellite tip and black nitrone impregnated stem to improve wear properties and reduce friction.

Manley Stainless Valve machined from 1-piece forging with a swirl polished finish and chrome plated stem. Sold pairs.

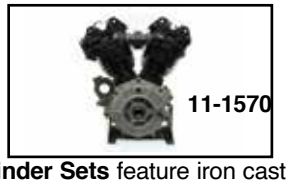
Knucklehead Cylinder Kit

Replica Details!



Replica Knucklehead Cylinder Sets feature iron cast construction, original markings with black painted finish and are pre-fitted with cast pistons and Hastings rings.

VT No.	Year	Fits	Compression
11-0506	1936-47	61”	7.5:1
11-1570	1941-47	74"	8.5:1
11-1267	1941-47	74"	Cylinder Set Only

Knucklehead Replacement Cylinder and Piston Kits are honed and pre-fitted with stock compression cast pistons and Hastings Rings. They are ready to run and will require break-in as suggested in the appropriate shop manual. Sold in pairs for stock stroke only. Order gasket set separately.

VT No.	Year	Fits	Compression
11-2630	1936-47	61”	7.5:1
11-2600	1936-47	61”	7.5:1
11-2601	1941-47	74”	8.5:1
11-2629	1941-47	74”	8.5:1

Knucklehead Replacement Cylinders Only for stock bore, stock stroke and compression. Must be honed to standard size for proper fit. Sold each without piston.

CLASSIC

SHOP TIP Piston Installation

Caution: Do not install piston pin without lubricating it first with motor oil or assembly lube. Touch up outer edges of piston pins with emery cloth before installation.
1. Refer to applicable service manual for proper installation methods.
2. Piston should be measured front-to-rear at the base of piston skirt, perpendicular to wrist pin.
3. Piston should be set-up with the following tolerances:
Recommended piston/cylinder running clearances:

	Minimum	Maximum	Preferred
Evolution® Models (Aluminum Cylinders)	.0015	.0022	.002
Big Twin Models (Cast Iron Cylinders)	.0015	.003	.0025
Sportster Models (Cast Iron Cylinders)	.003	.004	.0035

Specifications for ring end-gap are supplied with the ring sets and vary by type and size.
Note: Run engine at moderate speeds for at least 500 miles, avoiding excessive running in lower gears, in order to properly break-in new pistons and rings.

Barnett Scorpion Clutch Kit features over twice as much friction surface area compared to stock clutch. All Scorpion clutches provide a positive engagement and release. Scorpion clutches incorporate 6 heavy duty coil springs. In addition, an extra spring set with a different spring rate is included which allows the clutch to be tuned for street or race application depending on usage. Tunability is easy without removal of the primary cover. Barnett Friction Plates are compatible with any primary oil. Kit is designed to be used with stock type clutch basket. Fits 1936-Early84.
VT No. 18-3822

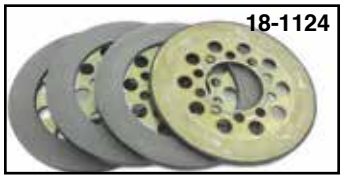
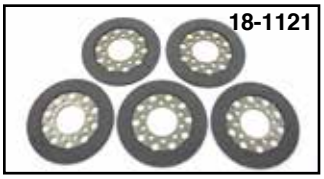
Clutch Set



18-1124



18-1121

Extreme Duty Police Service Clutch Set is an original molded fiber over metal replacement clutch set for Big Twins 1936-84. It is superior to stock or competition units in that fiber is integrally molded to plates, not glued on and holds constant thickness under heat. The1968-84 type is also available bonded to alloy plate for lighter weight. Use steel plate VT No. 18-3652 when installing.

VT No.	Years	Type	Plates	Material
18-1124	1936-67	Steel	3½	Fiber
18-1121	1968-84	Steel	5	Fiber
18-0150	1968-84	Steel	5	V-Prene

18-8288

V-Prene Clutch Kit for 1941-84 Big Twin includes 5 friction and 4 steel plates.
VT No. 18-0172

Red Eagle Clutch Set by Alto is available in fibers and steel. Sold as V-Prene or Red Eagle type. Both are bonded to steel.

VT No.	Year	Type
18-8277	1941-67	Red Eagle, requires extra steel plate
18-8279	1968-83	Red Eagle
18-8280	1968-83	V-Prene

Barnett Series K Clutch performs flawlessly under extreme heat conditions with smooth precise shifting. The steel backing plates have maximum strength and V-Prene friction plate is the most durable friction material made.

Fits 1941-83. Note: Made to run wet or dry in a sealed primary. Incidental oil from primary chain will not affect clutch operation. One extra steel plate is required for 1967 and older models. Rivets are sold in a pack of 25.

For Reference Only

Reverse Components fits 1939-52 EL, 1941-75 FL. This kit includes only the parts that are reverse specific, all other parts must come from your original 3 or 4 speed. Order related components separately. Case must have hole drilled for idler shaft. (Most Big Twin cases before 1976 are drilled.) Cannot be used as 4 speed models, it will be 3 speed with reverse.

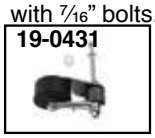
19-0414

20-0132

Rear Pulley or Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7/16" bolts. I.D. is 2 1/16" for 1980-99.



19-0431

Rear Chain Tensioner by LBV reduces chain vibration and frequency of adjustment by utilizing a durable urethane roller which revolves on sealed bearings mounted on chrome anchor plates.

Forward Brake Control Kit

FXST Replica Forward Brake Control for use on all 1970-99 Big Twin with Shovelhead or Evolution engines equipped with hydraulic disc or drum brakes. Designed after the 1984-99 FXST which places the driver peg in back of the brake pedal, so the brake is easier to operate from this comfortable position. Redesigned to accept a Wagner or Kelsey-Hayes style master cylinder or GMA masters, also available with chrome KH or Wagner style masters. Hardware includes linkage pedal mount plate, rubber covered footpeg. This kit is the exact compliment to our shifter kits listed and when used with one of these kits, places the pegs in forward and raised position.

Original Forward Brake Control Assemblies will equip all Big Twins with hydraulic brakes and powered by either Evolution or Shovelhead engines. Available in either Wagner or Kelsey Hayes styles, with or without master cylinders. Footboards can be fitted to our Wagner style kits VT No. 22-0500, 22-0505 or 22-0506. Wagner styles use 41761-73 master cylinder, or Kelsey Hayes type 41576-79A, for those wishing to utilize their existing master cylinder. Complete assemblies include detailed instructions and diagram for installation.

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

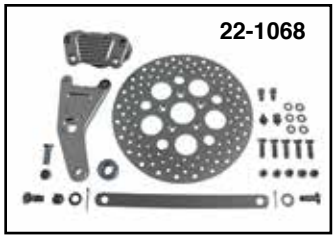
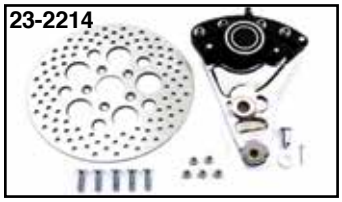
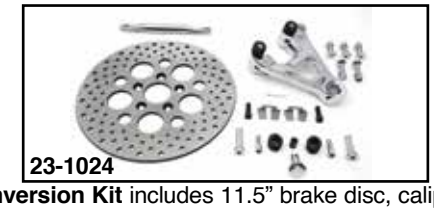
1973-84 Big Twin Rear Disc Kit

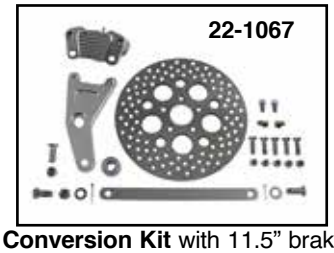






Caliper Conversion Kit includes 11.5” brake disc, caliper mounting bracket and caliper assembly. It helps eliminate caliper rattle and chatter.

VT No.	Rotor	Year	Caliper
23-2216	Steel	1973-82	Black
23-2214	Stainless	1973-82	Black
23-1109	Stainless	1973-82	Chrome
23-1024	Stainless	1982-86	Black



11.5”

Caliper Conversion Kit with 11.5” brake disc updates 1973-82 FX-FL models from 10” to 11.5” brake discs. Includes caliper bracket, 11.5” drilled brake disc in stainless or zinc plated steel, mount bolts and the dual piston caliper. By converting to this style caliper, rattle and chatter will be eliminated and a much greater stopping power will be achieved. Calipers should be used with master cylinders listed below. Use with ⅝” bore master cylinder.

VT No.	Item	Brand
22-1067	11.5” Kit with Stainless Steel Disc	GMA
22-1068	11.5” Kit Complete with Steel Disc	GMA

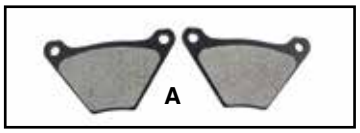
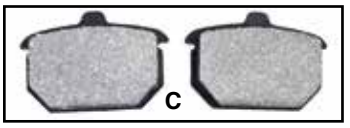
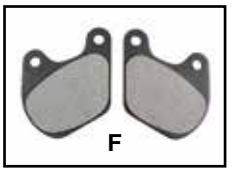
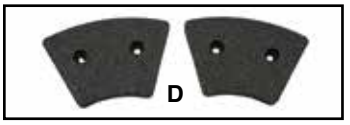
Brake Disc Pad Set







Brake Pad Assortment. VT No. 23-0000



Brake Disc Pads are available in **Duro** or **SBS brand**. **Duro, Duro Disc Kevlar** for excellent stopping on all types of disc brake rotors. **Duro Rotor** replacement pads are a soft organic compound designed to be compatible to all types of brake rotor. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel brake rotors. **Ceramic Pads** are designed for general purpose use on carbon steel brake rotor and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** designed for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron rotors. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

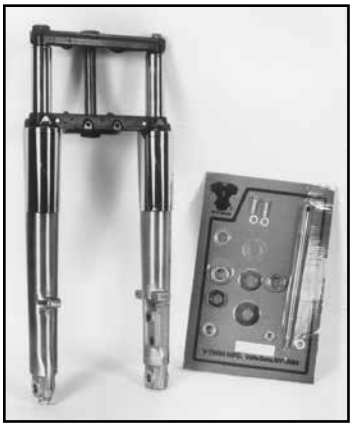
Glide Drum Brake Fork

1949-59 Units feature early style solid mount trees.



DRUM

Glide Fork Assemblies feature black lower triple tree without lock tab and accept a left or right side drum brake assembly with chrome or polished slider.

The 1960-71 Style has a black top tree with 3" center to center spacing which will accept rubber bushing kit
VT No. 28-0221. VT No. 25-2134 riser clamp fits two piece bars. VT No. 25-2132 Riser Kit fits one piece bars.

Both VT No.'s 25-2134 and 25-2132 riser kits allow the use of 24-0250 handlebar clamp cover on aluminum cowl. Both forks accept VT No. 24-0251 aluminum cowl set or 3 piece chrome VT No.'s 24-9913 or 24-9909 stainless panel set, not included. Includes slider covers VT No. 24-0190 in chrome. Both have polished aluminum lower sliders with late 1977-up type internals installed in 41mm stock length hard chrome fork tubes. Axle nut, neck bearing, top crown nut and dust covers included.

41mm 10” Dual Disc Fork Assembly

Glide Fork Assembly with chrome sliders accepts left side drum brake. Assembly features black triple trees without lock tab and 3” center to center spacing which will accept rubber bushing kit.
VT No. 24-0867

The V-Twin™ Fork Assembly is shipped complete with axle, axle nut, spacer, top nut, bearings, cone nut, dust cover, triple trees, fork tubes and sliders. Fork tubes and sliders are fully assembled with internals. Final assembly of the remaining components is done by the dealer. Every leg assembly is shipped dry. We recommend use of the appropriate fork oil such as Type B. The amount of fork oil to add varies by model. A FX will need about 6 oz per leg, a FL will need about 8.5 oz per leg and a FXWG needs about 10 oz per leg. Due to oil cling, a dry fork leg needs about 1 oz more to fill than a drained leg would require.

41mm Glide Fork Assemblies include forged chrome replica triple trees and hard chrome tubes on stock length forks, chrome tubes on overstock length and polished or chrome lower legs with all internals installed less hardware. Stock overall length is 31”.

FXWG Style Dual Disc Fork/Wheel and Caliper Assemblies to fit 1948-99 Big Twin FL-FX-FXWG feature polished or chromed lower sliders without reflector boss, hard chrome fork tubes and internals installed. Includes chrome trees with 1” diameter stem and frame lock tab, neck bearings, axle spacer and top nut. Stock length is 31” overall. Kit also includes 21” all chrome assembled wheel with bearings, drilled 10” steel brake discs with chrome screws, and choice of black or chrome dual disc calipers complete with pads. VT No. 24-9947 has smooth lower legs.

Chrome Top Fork Tube Plug fits 1952-71 33.4 mm tubes. Replaces 45756-59. Sold each.
VT No. 7621-1

Attention!!
These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

V-Twin Replica Motorcycle Kit

V-Twin Replica Knucklehead
This machine is recreated with the original *Bobber* styling of the late 1940's, utilizing the full range of V-Twin Replica Parts. Engine details include cast motor case with relay and number boss, but reinforced at cylinder base area for added strength. Knuckleheads are replicated from ductile cast iron with accurately formed valve cover set and plumber style manifold. Foot Shift model includes handshift gate and handle for decoration only. Other components in assembly include:

- 29° V-Twin Replica frame
- Replica Knuckle Tanks
- Chopper Solo Seat
- 16" Rear and 18" Front Wheel
- Chrome Stock Inline Spring Fork

We've done your homework on this one!

- V-Twin Replica Motorcycle Kits are equipped with all the necessary parts except gas, oil and battery electrolyte!
- All components used throughout the assembly have been selected for each particular year of application.
- Engine is completely assembled pre-run and tested for oil pressure
- Transmission completely assembled
- Wheels, laced and trued in our facility with bearings pre-set

Knucklehead Service and Parts Manual is 492 pages. Full parts service and dope manual includes a detailed restoration section that is presented by Dan Henke of Cairo, New York. Dan illustrates all the overlooked items that can cost points during a competition when being judged. Shop book includes service, parts and dealer tips for the models and years that are listed.

V-Twin™ Replica Knucklehead Frame

- Authentic reproduction of the factory version.
- Forged parts as original in neck, front and rear engine mounts, side car loops, top seat yoke, footboard tabs and rear axle plates.
- Brazed parts: Top motor mount, front tank mount, sidecar loops, footboard mount, transmission strap, center post strap, rear fender cross bar saddles, oil tank mount and upper rear frame bars at tank tube
- Exact blanked and formed stampings are utilized in appropriate areas.
- Rear fender cross bar is supported by exact duplicated "saddles" brazed at each end. Seat post and mechanical brake cross shaft bushings, correct tool box mount and grease fittings are installed.
- The 28° or 29° neck angle will accept inline spring forks.
- Frame accommodate Knucklehead or Big Twin Flathead Engines and 3 or 4 Speed transmission only.
- Knucklehead frames require purchase of clamp on coil bracket kit VT No. 49-0099.

Accepts Knucklehead or BT Flathead engine and 3 or 4-speed transmission. Includes seat post, brake cross shaft, rear axle assembly, transmission plate and a motor alignment plate for safer shipping. Cross shaft bushings, tool box mount and grease fittings are installed.

***Note:** Includes seat post, transmission plate and axle assembly.

***Note:** For original look on rear axle plates, the rear brake slot on the left side must be cut out at the front. We have left this closed for builder to remove as desired. ***Note:** Seat post and cross shaft bushings may require further reaming for proper fit.

V-Twin Replica Knucklehead Frame

1936-40 Neck has original forge mark!

Over 8,000 served *since* 1995!

Replica Frames with accoutrements as shown on detailed areas make this the premier frame in the industry.

The Construction

V-Twin™ Replica Frames feature steel forgings in neck, front and rear engine mounts, rear axle plates, swingarm and shock mounts. In this process, the steel is first fired as red hot ingot, next huge hammers compact and orient the grain structure into a rough shape of the parts. Subsequent hits form the part into its final shape, after which it is machined and heat treated which results in increased strength and resistance to wear. The related components used in construction are accurately formed stampings and drawn over mandrel seamless tubing which is tig welded together during final assembly.

Dan Henke explaining the TT Oil Tank

Steel Parts deliver full strength and exact detail in front engine and side car lugs.

Forged Neck yields the hallmark look of this replica, which will accept a neck lock and glide damper stud. Top engine mount has key hole slot which is the 1953-57 type. Spark and throttle cable mount tabs are also provided.

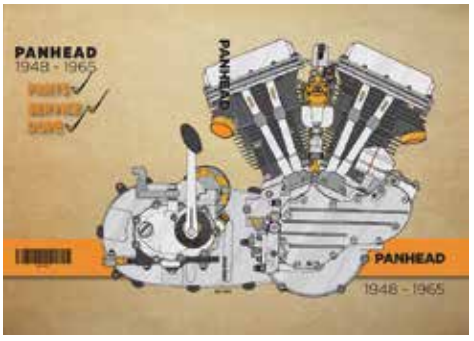
Kits include all parts necessary for complete construction!

Authentic Fork Look!

Accessories include original style Spotlamps!

Our Replica is supplied with all the options included. There are no extras. There is nothing else to buy. You can plan your construction project up front and actually be able to visualize the end result. You will not end up spending extra time and money searching for parts that are virtually impossible to find. In the long run, you would spend more time and money on parts than you would the V-Twin kit.

Industry First! First Assembly done Raw Finish in 1998!



Panhead VT No. 48-1166

- Available as a complete project kit based on an authentic **V-Twin Replica Wishbone Frame.**
- Unassembled kit is available with parts necessary to complete an entire Exemplar Panhead.
- Kits are available in either chrome, with chrome plated components and accessories, or as a restoration style with restoration finishes of black and parkerized components.
- Choose hand or foot shift control assemblies for desired configuration.
- Supplied with a completely assembled and test run 74" V-Twin Replica Panhead™ engine with either aluminum or chrome detailing.
- Pre-wired dash base assembly
- Parts book and maintenance manual included
- 4-Speed early transmission is assembled into the V-Twin™ Replica 4-Speed gear box, complete with ratchet top and chrome or restoration particulars.
- See the V-Twin Mfg.™ catalog for details on all items included in this kit.
- Replica Motorcycle Kits are sold as component parts. Manufacturer's Statement of Origin (MSO) is supplied for the frame and engine.
- Check your state for registration, title and licensing requirements.

Replica Straight Leg Frame

Replica Straight Leg Rigid Frame with cross tube is for chain drive models. This frame is an authentic reproduction of the 1954-1957 straight leg frame with a stock 30° neck rake. Details include forged parts as original neck, front and rear engine mount, side car mounts, top seat yoke, axle, seat post and footboard tabs. Front engine mount spacer will allow installation of a Knucklehead or Flathead engine. Cross shaft may be removed for use with hydraulic or disc brakes. Disc or drum brake tabs are available separately. Seat post bushing and mechanical brake cross tube bushing may require reaming prior to assembly. The frame has an indent on the left lower rear frame bar for tooling fixture. A Bill of Sale is supplied.

55-2018		Pan Retro

1957 Panhead is an authentic style reproduction of the original, complete with all parts to assemble a motorcycle. Parts may be substituted as requested for each build. Kit is sold unassembled and is not provided with a title for registration. Kit can be assembled with ordinary mechanic's tools and includes parts book and maintenance manual. This is a complete kit with foot shifter and chrome accents. Transmission and 74" V-Twin replica motor are assembled and factory tested. Check your state for registration and title requirements. Manufacturer's Statement of Origin is supplied for the frame and engine. Assembled by Tom Owejan.
VT No. 55-1520

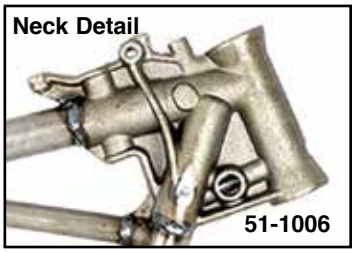
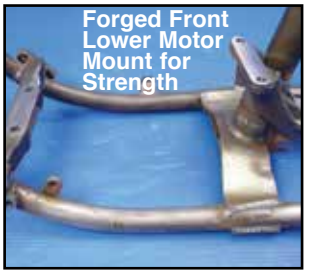
51-1004	1969-84

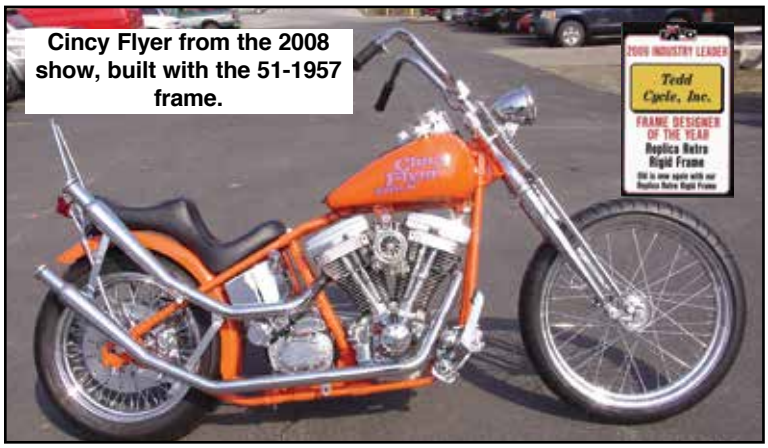




Forged Neck is accomplished in 4 stages.

The Forging Process

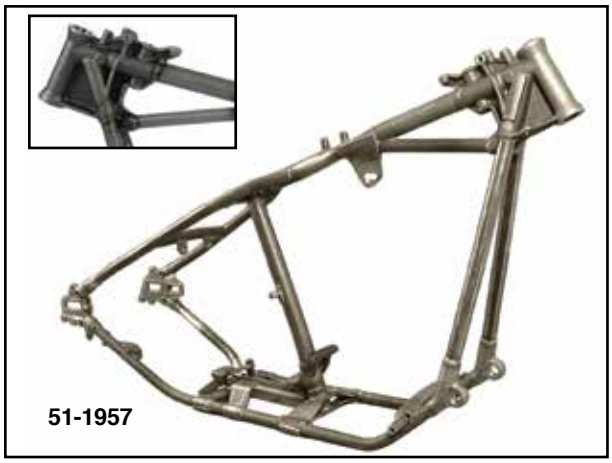
In this process, the steel is first fired as red hot ingot, next huge hammers compact and orient the grain structure into a rough shape of the part, subsequent hits form the part into its final shape, after which it is machined and heat treated which results in increased strength and resistance to wear.



Cincy Flyer from the 2008 show, built with the 51-1957 frame.

Retro Rigid™

51-1948



51-1957

Lowered Rear Axle Plate Set for threaded ⅜"-18 for fender brace sissy bar mounting. Adjusters threaded 3/8"-24 use screws for adjusters, to act as push type. Features a raw cast steel construction.
VT No. 51-1322

• Features a raised up axle position, so this lowers the swingarm and chassis in relation to the axle.
• Axle slots are ¾", for disc brake applications. Swingarm is for use with 4 speed models.
• Lowers bike 2" and lengthens wheel base ½". Axle lowering plates take screw type adjusters. The blocks also have tabs to mount a sissy bar or fender brace to facilitate mounting the rear fender to the swingarm, for the "floating" rear fender look. There are ⁵⁄₁₆" x 18 drilled and tapped holes on the swing arm for mounting and "floating". Order swingarm pivot pin assembly separately.
• Race is installed, but the bearings are not included

Dropped Swingarm for 1973-1984 FX and FL chain drive models only.

Ignition System

V-Fire Ignition Systems fit all 1970-98 carbureted models and requires sensor cup for 1982 and earlier applications. Order tach interface, sensor cup and screw separately if required. **Note: Order Coils When Required.**

VT No.	Fits
32-9500	Single Fire Ignition fits Evo, Shovel and Sportster to 1997. It can be set for Street or Race-Electric or Kick Starter includes rear cylinder timing adjustment for rate of advance. Compatible w/single fire coils.
32-9503	Single Fire Ignition Kit fits As Above Includes coil, 8.5mm wires and sensor cup
32-0588	8.5mm Wire Set

V Fire Ignition Kits are available in ***dual fire*** where there are 2 sparks at the same time and ***single fire*** where there is 1 spark for each cylinder when it is fired, (separate). Each kit includes a mechanical advance unit and all hardware. Order coil separately 32-0467 coil has 2 separate coils inside to fire independently.

VT No.	Type	Coil
32-0468	Dual Fire	**32-0511**
32-0469	Single Fire	**32-0467**
32-1913	Single Fire	**32-0467**

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke.
This is the way the stock motor works on pre TC-88 motors.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Daytona Twin Tec External Ignition Kit for 1970-84 FL and 1971-84 FX models. Dual fire electronic ignition system which includes trigger rotor for mechanical advance mechanism. Features a digital set RPM limiter in 200 RPM steps from 5,200 to 7,000, status LED for static timing, electronic dwell for maximum ignition energy at high RPM, reduced current draw at low RPM, and a simple two wire hook up. Reliable starting in all conditions by operating down to below 6 volts, and is rated to operate at 260°F. **VT No. 32-1036**

Daytona Twin Tec

Daytona Twin Tec Internal Ignition Kit for 1984-99 Evolution Big Twin, 1970-84 Shovelhead Big Twin and 1971-97 Sportster models. Kit includes ignition, coil and spark plug wire set.

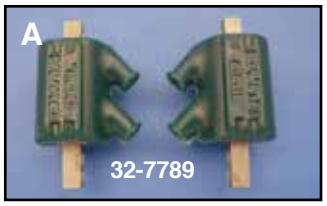
DYNA Ignition

Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire

Replacement Rotor for Dyna Ignitions.

VT No.	Fits
32-9300	DS-6-1
32-9301	DS-6-2



Dyna Coils. 35,000 volt! Works with all points ignitions, aftermarket or factory electronic ignitions. Note: 32-7792 is electronic, 32-7793 is for points ignition.

VT No.	#	Volt	Ohm	Dyna	Type	U/M
32-7789	A	12V	3	DC-1	Angle, Dual	Pair
32-7790	A	6V	1½	DC-2	Angle, Dual	Pair
Use 2 for dual plug heads						
32-7792	C	12V	3	DC-6	Stock, Dual	Each
32-7793*	C	12V	5	DC-7	Stock, Dual	Each
32-8055	B	12V	3	DC-3	Angle, Single	Pair
32-8086	A	12V	5	DC-8	Angle, Dual	Pair
32-9035	B	12V	5	DC-10-1	Angle, Single	Pair

***Note:** Use 2 for single fire ignition.

K.V. Recommends the following coils for Dyna Ignitions:
DS6-1 Ignition VT No. 32-7778
Street, Single plugs use DC-7 or DC-8
Race, Single plugs use DC-1 or DC-6
Street/Race Dual plugs use 2 DC-2 or DC-5, wired in series
DS6-2 Ignition VT No. 32-7777
Race, Single plugs use 2 DC-3
Street, Dual plugs use 2 DC-7 or DC-8
Race, Dual plugs use 2 DC-1 or 2 DC-6
Street, Single plug uses 2 DC10-1

Dyna Electric Tach Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twin when electric tach is used. **VT No. 32-7799**

Dyna Ignition Booster for single point systems only transforms inconsistent electrical surges into controlled bursts of energy to the coil,power is not wasted.**VT No. 32-7787**

Chrome Module Covers fits 1980-99. **VT No. 42-0399**

Dyna 'S' Hi-Performance Ignition System is self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer, so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. **Note:** For dual plugged heads, on 1980-up use advance mechanism, VT No. 32-7510.
VT No. 32-7778 (DS6-1)

Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.
VT No. 32-7777 (DS6-2)

Dyna 2000i Digital Ignition available as a module only or complete kits that include correct coil. Features include single or dual fire operation,8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows the mechanic or tuner the ability to fine tune 2000I Ignition but requires adapter.

V-Fire Stock Replica Dual Fire Coils are factory replacement quality to fit stock brackets.

VT No.	Year	Volt	Color
32-0711	Pre1965	6V	Red
32-0128	1965-79	12V	Black
32-1268	1965-80	12 V	Red (4.8 ohm)
32-0129	1980-83	12V	Black (2.8 ohm)

Note: 32-0129 for electronic ignition.

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke.
This is the way the stock motor works on preTC-88 motors.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Coil

32-0090

32-7802

Accel Single Fire Super Coil features ultra fast coil rise time with voltage output 45% higher than stock & 3.0 ohms of primary resistance. Mounts to stock coil bracket & fits under stock coil covers. Fits all Twins except TC-88.

VT No.	Type
32-0090	Yellow
32-7802	Chrome

32-0130

32-1064

Accel Power Pulse 12V Dual Fire Coil provides longer spark duration with a greater KV rating and faster rise time than stock coil. Molded in epoxy. For 1965-83.

VT No.	Epoxy Finish
32-0130	Yellow
32-1064	Black

Accel H.V. Dual Fire Super Coil bolt on for points ignition systems. High-tech molding for 1965-99 with 4.7 ohms. Yellow.

32-1739	Gear Kit

COMPACT DESIGN REPLACES EARLY 6 OR 12 VOLT GENERATORS

Alternator Conversion Kit replaces original generator and regulator. Compact, high output alternator, is 3¼" long, weighs only 3lbs. Features include high power output, billet housing for strength and accurate alignment, stress proof shaft which is stronger than stock. The kit includes alternator unit in chrome or black, black voltage regulator and instructions. It fits 12 volt 17 amp 1965-83 XL as well pre 1965 which have been converted to 12 volt electric. Kit can used on earlier models if generator bolt holes in case are drilled out to 5⁄16". Cannot be used with mini (12N55A-3B) battery.
