Extreme Duty Battery Cable Set features #2 gauge wires are very fat and flexible. The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2,000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket. Sealed and insulated with black heat shrink tubing means no moisture will get in these cables. Includes a 10" and 12" cable.

S&S 1⅞ 'E' feature adjustable volume pump, enrichment device for ease of starting and a throttle spool assembly designed for late 2 cable operation. Supplied with tear drop air cleaner, mounting bracket and black fuel line. Super 'E' carburetor is approximately 1 7/16" shorter than the Super 'B' carburetor, making installation length of the Super 'E' the same as stock. Can be used with 3.5 or 5.0 gallon Fatbob tanks. The 1⅛" is for street stock applications. Intake manifold clamps or flanges must be purchased separately when they are required.

Braided Cable Heat Shrink Tubing. Clear heat shrink tubing is for use on all braided stainless steel cables to prevent cable from scratching painted or chromed surfaces while still keeping that braided steel look. Kit contains four 16” long heat shrink tubes to cover two throttle cables, one clutch and one speedometer cable. Bulk tubing is in a 10 foot roll.

Important Gas Tank Information: All tanks are shipped unpainted unless otherwise noted. Caps and petcocks are not included. Carefully check the new tank for flaws and fit before painting. **Do not grind or sand the seams or joints**. Clean the inside of the tank and it is suggested to pressure test and use a tank sealer. Check petcock openings, making sure the petcock can be easily installed. Use proper hardware to mount tank, including correct bushings, brackets and spacers required for assembly. **Tedd Cycle, Inc**. is not liable for paint work or labor claims of any kind. Tedd Cycle, Inc. is not the manufacturer of the gas tanks.

***Note:** All tanks with shut off rod provisions may require fuel rod alignment before installation of shut off assembly.

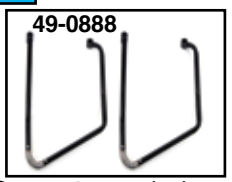
Saddlebag Set

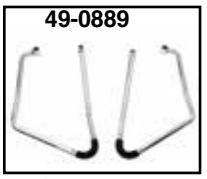
Loctite Style

Loctite Saddlebag Set recreated as on 1946-48 models, include chrome plates to fit all rigid frames. Replaces 11785-43 in heavy black leather with orange rosettes. Unique design lid keeps bags closed and in shape. Measure 16" L x 5" W x 14" H.
VT No. 48-3156

Black X-Large Three Buckle Thro-Over Set measures 14½" Long x 6" Wide x 12" High.
VT No. 48-3127

Large Three Buckle Thro-Over Set. All bags glued, sewn and riveted. Available black only. Measures 13" Long x 5" Wide x 12" High.
VT No. 48-3128





Chrome Saddlebag Supports are designed to fit the contour of the fender struts and protect your bags from the brake caliper and swing arm. Fits 1971-85 FX-FXE.

VT No.	Type
49-0888	Black, Adjustable
49-0889	Chrome, Adjustable

Saddlebag Set

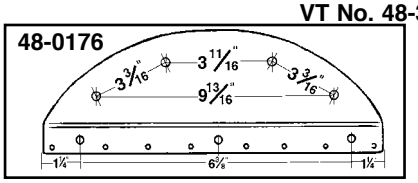
Black Leather Glide Set features chrome buckles, spots, conchos and Neoprene back to hold shape. Each bag measures 21" x 14" x 6' and is designed to replace the stock fiberglass saddlebags on 1958-84 FLH, by mounting to existing pins on stock bag supports or VT No. 49-2418 which are available separately. Also included are plate brackets which may be mounted to fenders or most struts. **VT No. 48-3132**

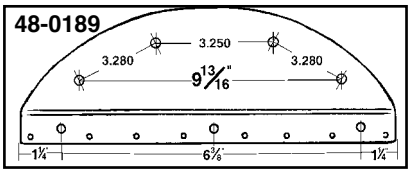
Saddlebag Mount Bars include four bar sets with stanchions.
VT No. 2634-12T

1936 Style Knucklehead Saddlebag Sets. Conchos and a five strap closure decorate these bags which are restoration quality for all 1936-46 Rigid. Include chrome mounting plates. Measure 14⅜" length x 5" width x 12" height.

VT No.	Color
48-3121	Black
48-3144	Brown

Black Leather Saddlebag Set is complete with chrome mounting plates, for rigid or swing arm mounting, conchos, fringe and chrome rivets. Bags are suited for a later 1950's restoration or for a nostalgic late model dress up on 1936-57 Rigid models. Measure 19" long x 5" width x 12" height.
VT No. 48-3120





Saddlebag Mounting Plates are chrome for 1936-57 rigid rear fenders, exact stamped as original. Order chrome acorn mounting bolts separately.

VT No.	Type
48-0176	Mount Plate Set
8205-8	Bolt Kit

Saddlebag Mount Plate Rail Kit is for right and left sides. Each side has five stanchions to use with four or five rigid frame saddlebag mount plates. Each rail has the correct curvature but must be cut to length. Each stanchion has one hole drilled through, so the bar slips through. Fits 1936-52.
VT No. 50-1562

Spring Fork Windshield for 1936-47 Knucklehead or 1948 Panhead. These windshields are molded directly from actual vintage windshields that National Cycle manufactured beginning in 1937. Includes mounting hardware like original. Made of Pyralin plastic which was somewhat flexible and thus required a beaded edge as well as a steel reinforcing ring.

Windshield

Clear Polycarbonate Deflector screen LX features rake adjustment and quickset mounting hardware for 1" handlebars. Fits1982-1983 FXR, 1984-1994 FXR,1993-2017 FXD, 1984-up FXST, 1986-up FLST, 1994-up FLHR, 1971-1984 FX, 1960-1984 FL, 1957-up XL.

Engine Dress Kit

42-0690

Dress Kits for XL's include all die cast replacement parts as pictured.

VT No.	Year
42-0690	1994-03
42-1055	1991-93

Die Cast Primary Covers are manufactured from a casting process. It is the nature of parts produced from this process to have small random subsurface imperfections that can be uncovered during the polishing process. These may appear as very small cosmetic imperfections after chrome plating. We also do not polish in areas that are not readily visible once assembled on the motorcycle or by polishing machines such as small depressions or tight corners. As these conditions are common in polished and chrome-plated castings, a reasonable standard of acceptability has been established to bring you the highest quality product at an affordable price. This part meets Perma Chrome™ cosmetic standard. The aforementioned cosmetic conditions are considered reasonable for this part and are not considered warrantable.

(1) **Roller Burnished Stem:** Roller burnishing smooths the finest grind finish (16 microinch) to a 4 microinch.

(2) **Melonite, Special Black Stem:** This is a heat treating process developed and patented in Germany. Gives the valve a Black Smokey look. Very hard and slippery. Currently being used on O.E.M. valves available in Rowe or Black Diamond brands.

(3) **Rowe Pro:** Forged one piece stainless steel valve precision CNC machined. Features special black Melonite finish, swirl polished tulip area and heat treated water tip.

One Piece Valve

MANLEY

Manley Stainless Valve machined from one piece forging with a swirl polished finish and chrome plated stem. Sold pairs.

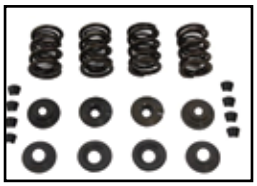
Kibblewhite Valve Guide Seal Installation Tools
Valve guide seal installation tool kit is manufactured from high strength 6061-T6 aluminum for increased durability when compared to other plastic installation tools. Precision fitment onto the seal OD to help the builder center the seal over valve guide so that a few light strikes from a hammer will seat the seal. Radiused top striking surface reduces the likelihood of a burr forming from deformation. Available in a kit of four tools for various application or separately, Kit 16-0426 includes installation tools for 1999-04 Twin Cam, 1984-99 Evo Big Twin, 1986- 03 Evo XL, 1966-84 Shovel, 1948-84 Shovelhead, 1948-65-84 Shovehead, 1948-65 Panhead and 1957-E83 Ironhead XL Single installation tool, 16-0427 is for use on 1999-04 Twin Cam, 1984-99 Evo Big Twin and 1986-03 Evo.

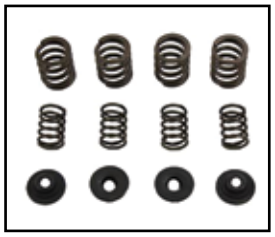
Valve Spring Kits

Sifton Lower Valve Collar and Seal Kit for all 1957-85 XL models. Kit includes four special lower collars machined to accept K-line style seals. Two intake seals and two exhaust seals. Top of guide must still be machined to accept seals. Seal installation tool included.

VT No.	Item
11-0821	Kit
11-0821A	Lower Collar Only



Kibblewhite Lightweight Valve Spring Kits include springs, keepers, retainer, and lower collars unless noted. Fits 1970-84 XL for 160 lb seat pressure, up to .460" valve travel. Hard-anodized aluminum retainers. May require "R" model valve to achieve installed height.
VT No. 13-2210



Valve Spring Set for Sportster .490" Lift Kit except Evolution. The above .490 lift kit features stock OD springs, interference fit to reduce harmonics and control spring surge. No machining required for installation. Springs have 20% more pressure than stock. Use with stock lift cams to .490. Supplied with steel top collars. Uses stock lower collars. Fits 1957-85.

No Head Work Necessary

Big Bore kits on this Page Do Not Require Any Machining!

The Sifton cylinders have a very thick, large O.D., "cast in" liner which has been proven to be an important factor to maintain thermal stability which is the ability to retain the important cylinder bore dimension through repeated heat cycles.

Top End Gasket Set fits Big Bore kits. Head base gasket set with .040 gasket, beaded, blue veloprene coated with 4 O-Rings. Fits 1986-2003.
VT No. 15-0393

KB PERFORMANCE PISTONS

***Note:** 2009-up cylinders cannot be overbored. Requires the purchase of 1200cc cylinder to be used with piston kit.

The Keith Black 390 Hypereutectic alloy is cast in a permanent steel mold which makes it possible to build a light weight piston that makes more power, runs quietly, uses less fuel and lasts longer than any other type of piston being made today. We can now forget about running loose, noisy, oil-burning pistons. The low heat transfer of the alloy keeps the skirts cool so piston expansion is minimal.

The KB piston will make maximum power at 2 to 4 degrees less total timing than conventional pistons. All KB pistons sets are supplied with Hastings Moly Ring sets.

APPLICATION	RING END GAP FACTOR	PISTON TO WALL CLEARANCE
Street Normally Aspirated	.0065"	.00075"-.0015"
Street Nitrous or Supercharged	.0080"	.0015"-.0025"
Flat Track Gasoline	.0080"	.0010"-.0030"
Flat Track Alcohol	.0060"	.0010"-.0030"
Drag Gasoline	.0075"	.0010"-.0030"
Drag Alcohol	.0065"	.0010"-.0030"
Drag Supercharged or Nitrous Gas	.0095"	.0015"-.0030"
Drag Supercharged Alcohol	.0085"	.0010"-.0030"
Drag Supercharged Fuel	.0115"	.0020"-.0040"

Note: It is important to use our ring end gap instructions to avoid ring butting. Safe top ring end gaps can be found by multiplying the bore diameter by the appropriate ring end gap factor from the adjoining chart.
Example: 3.5" bore "Street Normally Aspirated" = 3.5" bore x .0065" = .023" top ring end gap.
Note: Second ring end gaps do not need extra clearance.

Important Note: Some items on this page may be emission-related parts subject to California or other emission control laws. Please see note on Emission Page for important information regarding emission control regulatory compliance and warranty information.

4-Speed Transmission Installation Tips

VT No. 17-0028, 17-0027, 17-0032, 17-0030, 17-0033, 17-0034, 17-0031, 17-0029

All XL Transmission assemblies are bench tested for positive gear engagement and disengagement but it is always best for a final check after unpacking transmission before being installed.

All V-Twin Transmissions are assembled with late style shifter cam plate that uses welded in pin for neutral switch indicator. On some early(Pre 1974) case this pin may have to be shortened or removed to allow cam plate to move freely. Failure to check this will cause transmission to not completely shift through all gears. This should be checked first prior to assembly.

Gear Engagement Check

Rotate pawl carrier (EE) until pawl carrier contacts lifter arm (Y+X). Hold the shifter cam (D) with opposite hand to prevent cam follower (I) from completing gearshifts. If hand pressure is released from shifter cam the gears will be drawn into complete engagement and all inspection procedures will be performed incorrectly.
Shift transmission into first gear then check gear to dog Pocket Engagement. Correct engagement should be 25%.
Shift transmission into all other gears checking Pocket Engagement, which must be at least 50%.
Filing of lifter arms (Y+X) will produce changes in Pocket Engagement.

Establishing Mainshaft and Countershaft Endplay

Use the thinnest low gear washer and mainshaft washer. On 1954-early 84 models the mainshaft thrust washer must be installed with Tang Down. For 1954-early 1984 models the mainshaft needle bearing will have to be installed. Temporarily install access cover to crankcase with all transmission parts. Carefully align Cover Dowel Pins and with a rawhide mallet tap into position and install four cap screws.

When installing transmission into case check shift fork shaft for correct alignment to case. Do not force transmission into case if shift fork shaft will not go in to case. If shift fork shaft is forced into case damage or bending to shaft will happen causing shifter roller finger to bind against shifter cam plate or shifter fork binging on shaft or with pawl carrier assembly.

On 1954-E84 Models Inspect case race and rollers, if badly pitted scored or worn they should be replaced. Correct fit of main bearing is .0006in-.0014in. If clearance is beyond specified limit a new race and bearings must be installed, and line lapped for proper fit. **Note:** Fitment of door to case may sometimes requires reaming of holes in access door or removal of alignment pins from case. If removal of dowel pins is necessary tapping dowel pin holes and use of additional bolts is suggested.

Note also that even during factory assembly process several access doors were tried before final assembly.

Using a Dial Indicator measure mainshaft endplay from sprocket side of shaft, press against clutch gear so that bearing seats against lock ring in access cover. Move shaft back and forth and measure endplay while holding clutch gear in. If endplay is not with specification (see chart) install thrust washer of suitable size.

With access cover still in place bend a discarded spoke or other suitable wire and wedge into hole on end of countershaft. Push and pull countershaft and measure endplay with dial indicator. If endplay is not within specification (see chart) install countershaft washer of suitable size.

After countershaft endplay has been established install oiler plug in access cover with oil hole up.

Note: On 1959-early 84 models the clutch must be temporarily installed and the 1984-85 models the Stator spacing ring and the Stator must be installed on access door before above Endplay clearances can be established.

When Mainshaft and Countershaft end play established install **new** shifter shaft into the crankcase so that the shifter lever arm is centered. Using a grease pencil mark the shaft at the 12 o'clock position by marking the shaft you can tell if the shifter lever arm position changes when installing the transmission. Correct shaft to shifter pawl yoke engagement is important for proper gear shifting. Install transmission and rotate countershaft slowly to check that the gear shift arm is engaged with shifter pawl. To do so rotate shift lever, a noticeable resistance to movement indicates proper engagement.

4-Speed Transmission

Complete XLH-XLCH 4 Speed Transmission Gear Assembly Unit includes gears, mainshaft, countershaft, shift forks and shafts assembled to trap door. Order right side case races, rollers, shims and bearings separately. Shift selector shaft included.

Andrews "C" Ratio Gear Sets provide true close ratio shifting for XL gear boxes.

VT No.	Fits
17-4850*	Late 1984-90 All XL
17-5622*	Late 1984-90 All XL (Sifton)

***Note:** From 1987-90 all XL models have "C" Ratio Main Drive Gears as stock parts. Also fits late 1984 alternator 1000cc models.

Gear	Stock Ratio	"C" Ratio
1st	2.52	2.29
2nd	1.83	1.66
3rd	1.38	1.26
4th	1.00	1.00

Andrews Wide Ratio 1st Gear Sets changes 1st from 2.52 ratio to 2.68 for more low end torque with 21T or 22T trans sprocket. Fits 1973-85. Can also be used on 1986-90 models if early type counter-shaft is used. **VT No. 17-9856**

***Note:** Consists of nine friction plates and eight steel drive plates. Add 12% more surface area. Double steel drive plate is not used.

18-0634

18-0376

Tamer Clutch Pull Kit will soften the "pull" required on 1986-20 Sportster models. The tamer replaces the stock Harley clutch pull end on 1986-20. The pivot is moved closer to the center so the clutch lever is easier to pull for those who have difficulty holding their clutch while driving. ***Note:** For use with the clutch outer ramp and the inner ramp assembly.

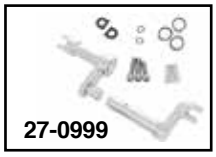
21-0453	Black Talon



XL Forward Control Footpeg Conversion Kits

- 2011-up XL models with forward control no longer allow standard rider footpeg; these kits let you mount standard footpegs on the late model XL's with forward controls
- Also works as replacement footpeg mounts on select OEM and V-Twin forward control kits for 2011-up XL models
- Kits includes a left and right footpeg mount in either chrome or anodized black finish complete with mounting hardware
- Available in standard length or +2" extended length

Note: If converting standard forward controls to extended, a longer shifter linkage rod (10¼" long) is also required **VT No. 27-0253** or use the 2" extension, **VT No. 21-0270** along with the original linkage rod.

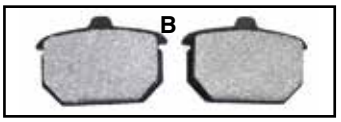
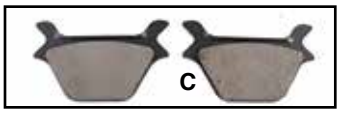
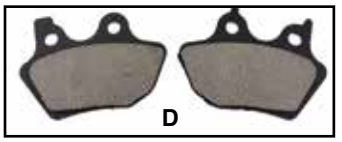
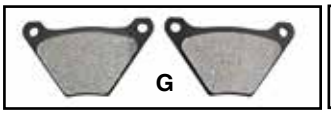
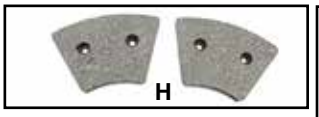
Disc Brake Pad

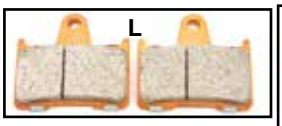












Disc Brake Pads are available in **Duro**, **SBS, Dura Kevlar, Dura Semi-Metallic** for excellent stopping on all types of disc rotors. **Duro** replacement pads are a soft compound designed to be compatible to all types of brake disc rotors. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel disc rotors. **Ceramic Pads** are designed for general purpose use on carbon steel rotors and can be used on carbon steel rotors and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** designed for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron rotors. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

24-2035 Kit with Chrome Lower Slider
1952-1981 Fat Kid Style Kit
24-2023 Kit with Chrome Lower Slider
1952-1981 FLST Style Kit
24-2024 Kit with Chrome Lower Sliders

The V-Twin™ Fork Assembly is shipped complete with axle, axle nut, spacer, top nut, bearings, cone nut, dust cover, triple trees and fork tubes & sliders. Fork tubes and sliders are fully assembled with internals. Final assembly of the remaining components is done by the dealer. Every leg assembly is shipped dry. We recommend use of the appropriate fork oil such as Type B. The amount of fork oil to add varies by model. A FX will need about 6 oz per leg, a FL will need about 8.5 oz per leg and a FXWG need about 10 oz per leg. Due to oil cling, dry for leg needs about 1 oz more to fill than a drained leg would require.

41 mm Fat Kid Style Fork Assemblies Only for 1982-03. Include chrome top tree, black lower tree with polished or chrome lower sliders assembled with hard chrome fork tubes and axle kit.

VT No.	Sliders
24-0765	Polished

Narrow Glide Conversion Kit allows use of 41mm leg assembly, 1984-99 style and utilizes the original FXD or XL 19" or 21" wheels, and the caliper and brake disc from the original motorcycle. 24-0958 is shown with stock leg assembly 24-0510 FXST style.

39mm to 41mm Conversion Kit

Narrow Glide Conversion Kit to fit FXD-XL 39mm models includes upper and lower triple trees, stem, stem nut, fork stops, axle, axle spacers and fender spacers. For use with 1984-99 FXST/FXDWG 41mm fork leg assemblies and 1984-99 narrow glide 19" or 21" wheel assembly with aluminum hub and front fender. Accepts OEM 11.5" brake disc and caliper (custom brakes may cause interference with laced wheels). Measures 4 15/16" between fender mounts. For front wheel speedometer operation, replace left side axle spacer with speedometer drive unit.

Note: See Vintage section for 1952-72 components.

Attention!!
These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

E-Z Fill Fork Tube Top Plugs feature a small oil fill cap built into fork tube top plug which will allow fork oil change/fill without removing top fork cap. Pairs.

Exhaust Pipes and Mufflers Warranty Information

There is no warranty on exhaust pipes & mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, cam timing, carburetor jetting, overheating, etc. and is not caused by defective manufacturing. This means once exhaust pipes have been installed and started these pipes are considered used. **If pipes are not to the dealer/customer satisfaction, contact us immediately for a return authorization before starting your engine.** Refunds and exchanges are not available. Manufacturers will guarantee all sets of exhaust systems against any kind of manufacturer's defects.

Accel 8mm S/S Spiral Core Ignition Wire Set

- Designed specifically for Harley-Davidson late model Sportsters.
- Delivers up to 5 times more peak energy than other "Performance Wires"
- Maximum RFI protection to shield sensitive electronics with 500 Ohms per foot
- Spiral core wire utilizes stainless steel alloy conductor with fiberglass/Kevlar inner core for strength
- Lower resistance delivers more energy to the spark plug
- Custom fit sets are ready to install-no cutting or crimping required
- Fully capable with Delphi fuel injection system

Daytona Twin Tec

Daytona Twin Tec External Single Fire Ignition Conversion Kit includes 50 state street legal selectable ignition module, sensor plate, rotor cup and adapter harness that allows use of tachometer and single fire coil. Allows use of external ignition on all 1970-1999 carbureted only Big Twins and 1971-2003 XL models. Helps prevent heat related ignition failures by replacing heat sensitive internal nose-cone style ignitions. Also available as complete kit with correct 3.0 ohm single fire coil and plug wire set.

VT No.	Item
32-3047	Conversion Kit
32-3048	Complete Conversion Kit with Coil and Wires

Daytona Twin Tec Internal Ignition Kit for 1971-97 Sportster models. Kit includes ignition, coil and spark plug wire set.
VT No. 32-3015

Replacement Ignition Module Cover bolt-on replacement. Harness 32-9014 required as noted.
VT No. 42-0399

Ignition Sensor Plate Assembly.

VT No.	OEM	Fits

Twin Tec External Ignition for 2004-06 Carbureted XL Models. Wide timing advance adjustment range accommodates stock to highly modified engines. Features digitally set RPM Limit (100 RPM Steps). Selectable multi-spark mode for quick starting and smooth cruise. Coil outputs protected against short circuits. Billet aluminum housing with black anodized finish. Easy plug-in installation supports all sensors including theft/security module.
VT No. 32-1014

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note on for important information regarding emission control regulatory compliance and warranty information.

DYNA Ignition

Dyna 'S' Hi-Performance Ignition System is completely self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. Great for dual plugged heads, on 1980-up use advance mechanism VT No. 32-7510.

VT No.	Item	Mfg#
32-7778	Ignition System	DS6-1
32-9300	Rotor	DS-6-1

Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.

VT No.	Item	Mfg#
32-7777	Ignition System	DS6-2
32-9301	DS-6-2	DS-6-2

Dyna Electric Tach Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twins when electric tach is used.
VT No. 32-7799

Dyna 2000I Digital Ignition available as a module only or complete kits that include correct coil as listed. Features include single or dual fire operation,8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows mechanic or tuner the ability to fine tune 2000i ignition but requires adapter harness.

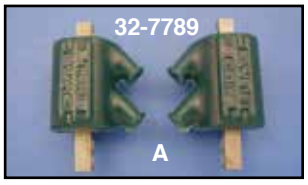
VT No.	Item
32-9151	Kit Single Plug/Single Fire with DC3-1
32-9152	Kit Dual Plug/Single Fire with DC1-1
32-9155	Kit Single Plug/Single Fire with DC6-5 miniature coil
32-9159	Module Only
32-9087	Sensor Cup, 1983-94
32-9124	Sensor Cup, 1995-up
32-9052	Cup Screw, 10 pk
32-9120	Advanced Programming Software for Above Ignitions

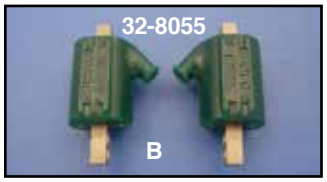
Dynatek Twin Cam Coil that will produce spark voltages in excess of 40,000 volts. Direct replacement unit, .4 ohms primary resistance, 14,000 ohms secondary resistance, increased horsepower, increased throttle response, easier starting. Fits 2007-up XL.
VT No. 32-1086

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke. This is the way the stock motor works.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire





Dyna Coils. 35,000 volts! Works with all points ignitions, aftermarket or factory electronic ignitions.

VT No.	Volt	Ohm	#	Dyna	Type	U/M

Dyna 2000 Digital Ignition Systems. Systems include Dyna 2000 HD-1 Ignition Module and a matched Dyna Twin Fire Coil for each application. Fits 1991-97 XL.
VT No. 32-0802

Dyna	Application
DC6-5	All FXR-FXST and Dyna
DC6-4	Dual Spark Plug Head

Dyna Twin Fire Ignition Coils are designed to work with Dyna 2000 HD-I ignition modules. Twin fire coils are slightly larger than stock coils, fit the stock mounting bracket. Twin fire coils can be used with any electric advance ignition system that incorporates dwell control except Dyna DS6-2 or similar type ignitions.

VT No.	Dyna	Ohms/Type
32-9285	DC6-5	3 (A)Twin Fire II Miniature Dual Output Towers, Replaces DC6-3
32-9264	DC6-4	3 (B) Four output towers Fits Dual Spark Plug

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note on for important information regarding emission control regulatory compliance and warranty information.

Module for XL

Power Commander III Engine Management System is for fuel injected models and allows for both fuel and ignition adjustments. The Power Commander includes a link cable and software package which allows you to fully map the fuel ignition curves on a computer. If a computer is not available, the fuel curves can be adjusted by using three touch buttons on the face plate. This unit includes a specific map, designed to improve performance over stock. Fits 2007-2008 XL 883, EFI model.
VT No. 32-3029

Replacement Ignition Modules bolt-on replacements.

***Note:** Does not fit 2000-03 Sport models

Daytona Twin Tec TCFI Gen 4 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin Delphi controller with J1850 data bus.
• Quickly auto-tune fuel curves for front and rear cylinder on a dyno or on-road with new WEGO IID dual channel wide band oxygen sensor interface.
• Powerful Windows software for custom programming and data analysis
• Full support J1850 data bus used for communications with turn signal/security module (TSM/TSSM) and instrument cluster
• Programmable user input and output.
• Easy plug-in installation
• Supports all sensors including theft/security module
Includes TCFI Gen 4 plug-in fuel injection controller with billet aluminum housing with black finish, dual channel wide band exhaust gas oxygen sensor interface, two Bosch LSU 4.2 wide band exhaust gas oxygen sensors, and two 18 x 1.5mm weld nuts for exhaust pipes. ***Note:** Not legal for sale or use on pollution controlled vehicles. Fits 2007-13 Sportster.
VT No. 32-7401

Power Commander V Fuel and Ignition Timing Control for each cylinder in a new smaller enclosure. Rev Xtend feature increases stock rev limiter. Switch between two maps "on the fly" maps can be adjusted on a "per gear" basis. Allows for one map per cylinder per gear if required. Adjustment of fuel and timing based on engine temperature is provided by the cold start feature. Will power up with USB cable only for programming. Note: not legal for use on pollution controlled vehicle

VT No.	Fits
32-0844	2007-2009 XL 883
32-1031	2010-12 XL 883
32-1032	2010-12 XL 1200

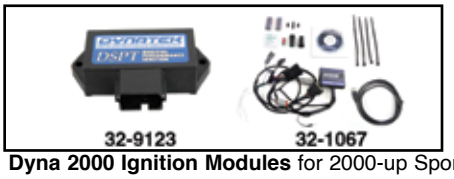
S&S Spark Technology Ignition System Installation Kit. Fits 2004-up.
VT No. 32-7806

Dyna Tek FI Controller is a plug module that offer 3 user selectable base fuel curves that are designed to improve engine operation and can be modified to suit a wide variety of modifications. Fuel mixture can be enriched or leaned as required. The Dyna FI controller uses the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications required to the stock ECU and removing the Dyna FI controller returns the vehicle to the factory configuration. Fits 2007-09 XL 1200. **VT No. 32-3036**

Daytona Twin Tec TCFI Gen 5 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin controller with CAN data bus.
• Continuously auto-tunes fuel curves for front and rear cylinders under actual riding conditions with WEGO IIID dual channel wide-band oxygen sensor interface.
• Robust alpha-N (throttle position and RPM based fuel control eliminates problems with long duration/high overlap camshafts.
• Extended data logging and diagnostics.
• Powerful Windows software for custom programming and extending data logging and diagnostics.
• Idle air control including idle RPM and cold start characteristics are fully programmable.
• Includes TCFI Gen 5 fuel injection controller, USB interface for PC link, WEGO IIId dual channel wide-band exhaust gas oxygen sensor interface, two Bosch LSU 4.2 wide-band exhaust gas oxygen sensors, and two 18 x 1.5mm weld nuts for the exhaust pipe.
Fits 2014-up XL.
VT No. 32-3051



Dyna 2000 Ignition Modules for 2000-up Sportster models feature programmable advance curves, rev limiter and LED diagnostic lamp for easy static timing. Plugs into stock harness and bolts to stock module location.

Alt Conversion Kit

Alternator Conversion Kit replaces original generator and regulator. Compact, high output alternator 3¼" long, weighing only 3lbs. Features include high power output, 17 amp@1000RPM, billet housing, for strength and accurate alignment, stress proof shaft which is stronger than stock. Includes alternator unit in chrome or black, black voltage regulator and instructions. Fits 12V 1965-83 XL as well pre 1965 which have been converted to 12V electric, may be used on earlier models if generator bolt holes in case are drilled out to 5⁄16". Cannot be used with mini (12N55A-3B) battery.

1967-80 XL Electric Start Kits

32-0012

XLH Electric Start Kits include parts pictured to fit 1967-80 XL. Your existing clutch drum must have starter ring gear attached. Side mount electric start oil tank 40-0400 must be purchased when fitted to 1971-80 models. Kick and electric start sprocket cover must be used if kick start is to be retained. Battery, top cover and strap not included. Also available with chrome starter motor.

32-1806 Installed

Electric Starter Kit includes a 1.4kw compact starter with integral Bendix, solenoid and gear reduction.

VT No. 32-1642

1. Be sure that if you are installing this starter on a kick start only model that your clutch basket has the proper ring gear installed.
2. This starter should be used with a starter relay and the battery cable included.
3. The cooling fins on the cylinder may need to be clearanced slightly as shown in Figure 1 in order for the starter to fit properly.
4. Depending on what type of oil tank is being used, brackets may need to be modified.
5. A battery with at least 255 CCA should be used to power the starter

32-1642

32-1806

Electric Starter Kit includes black 1.4 KW Hitachi type starter and black battery tray to accept H-12 battery. All components are included. Starter kit includes an alloy sprocket cover with electric start cut out and kick starter bushing; components allow kick start function to be retained. Clutch drum must have starter ring gear.

Oil Filter

Oil flows in around the outer diameter, through the filter media and out passing by the magnet. The magnet captures particles less than 10 microns which could have escaped through the filter wall.

Note: Chrome and Black Spin On Filters are 3" outer diameter.

Spin-On Oil Filters replaces stock units in chrome or black, Perf-form or V-Twin Brand in stock or with hex nut style. Perf-form Tall Chrome Filter is ¾" longer than stock and will not fit fuel injected models. All filters listed are low restriction type.

Hex	VT No.	Perf-form	OEM	Finish	Length	Year

Tamer Brake and Clutch Lever Set
The length of the brake and clutch levers greatly affects the rider's ability to modulate the bike's speed and smoothly engage the clutch. Tamer Levers offer a more ergonomic design that ensures rider's have a comfortable grip and reach. The Levers have a reduced length which means that riders can reach and engage them, evenly with a firm grasp of handlebar. This translates to quicker response time, enhance braking capabilities and smoother gear shifts.

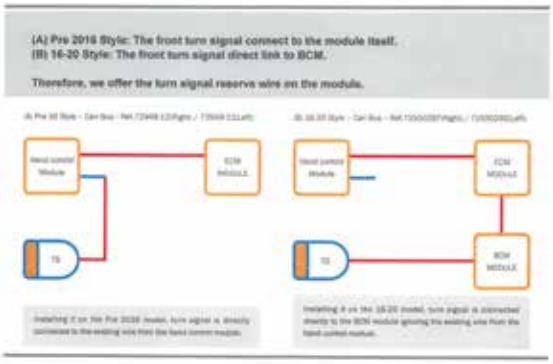
Handlebar Control Module

Two style of Can Bus systems,
(A) Pre 2016 Style: The front signal connect to the module itself
(B) 2016-20 Style: The front turn signal direct link to BCM



Handlebar Control Module includes front brake switch, 48" long wire harness and a turn signal reserve wire. Constructed of durable IP66-rated module and connector.
Right or left side modules can be combined together or assembled with the switch housing depending on your preference.

Note: The module does not include turn signal light

Rear Chain

19-0354

530 XLO Diamond O-Ring Chain includes a .214 pin which has been produced using a special alloy steel and case hardened for optimum strength, heavy series inside and outside link plates, special constructed extended solid bushings, solid rollers, quad stakes pin heading. 9300 lbs. average tensile strength.

VT No.	Links	VT No.	Links
19-0354	102	**19-0357**	110

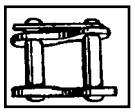
19-0349	108		

530 Diamond Nickel Plated Chain offers rust-proof protection along with a nickel finish. Each part of the nickel plated chain is individually plated before assembly to insure maximum coverage. 120 links. Diamond# 50ENP
VT No. 19-0347



Master Links. Replacement link for #50 530 chain. Note: sold in 10 packs unless noted otherwise.

VT No.	Fits Chain Type
19-0350	Standard
19-0351	Nickel
19-0375	XDL Self Lube
19-0353	XLO O-Ring, each
19-0376	N.O.S. Repair Link with 2 Masterlinks OEM, 40052-15

530 XDL Self Lube eliminates the possibility of hit and miss lubrication, as it has a constant and consistent lubrication in the pin bushing (wear) area. Combines the high strength and capacity of Diamond's proven performance with the advantages of fewer adjustment and less maintenance. Added strength is made possible by thicker and redesigned contour inside link plates.

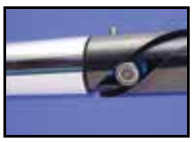
Gear Head Twist Grip Assembly for single cable.
VT No. 36-0000

Internal Throttle

VT No. 36-0570 Internal Throttle Sleeve. Custom design allows pull action of throttle cable for use with billet grips. **VT No. 36-0570**

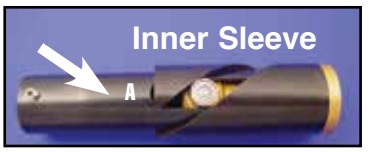


1. Cut 2⅜" off end of handlebar. Remove end of throttle handle that would attach to throttle cables.

2, Mark handlebar for inner throttle sleeve. Drill a hole for the set screw, this will hold throttle on the handlebar.

3. Remove set screw from the outer sleeve of spiral. Slide grip on & mark end of grip on the handlebar. Measure from this mark back to set screw in outer sleeve. This measurement will be used to mark & drill the throttle grip. Once drilled install grip. Use a small amount of Loctite® on set screw for final installation.

4. Note Set Screw (A) do not tighten so as to make contact with handlebar it will prevent throttle from turning.



Internal Throttle/Clutch Assembly features ball and needle bearing construction with built in return spring.

H-4 Xenon Blue Bulb is for superior night visibility. In the construction of the Xenon Blue Bulb, the Xenon gas is used to cool the filament and allow the halogen process to produce a higher light output. The special blue coating increases the whiteness of the light with only a trace of blue at the headlamp periphery. Unit fits all H-4 applications.

The LED

The LED (Light-Emitting Diode) is an electronic light source. Invented in the early 20th century and introduced as practical electronic component in 1962. All early devices emitted low-intensity read lights but modern LED's are available across the ultraviolet and infrared wavelengths with very high brightness.

Typical indicator LEDs are designed to operate with no more than 30-60 milliwatts of electrical power.

Solid state devices such as LEDs are subject to very limited wear and tear if operated at low currency and at low temperature. Many of the LEDs produced in the 1970s and 1980s are still in service today. Typical life times quoted are 25000 to 1000000 hour, but heat and current settings can extend or shorten this time significantly.

SMD So what is "SMD"?
SMD Stands for Surface Mounted Device. An electrical component that is usually mounted on the surface of a circuit board. Advanced technology has made these components smaller and smaller. Manufacturers are now making SMD LED's (Light Emitting Diodes). These incredible small SMD LED's are extremely bright and allow for more light in a compact bulb. Replace an old conventional bulb with these super bright, extended life, low energy bulbs.

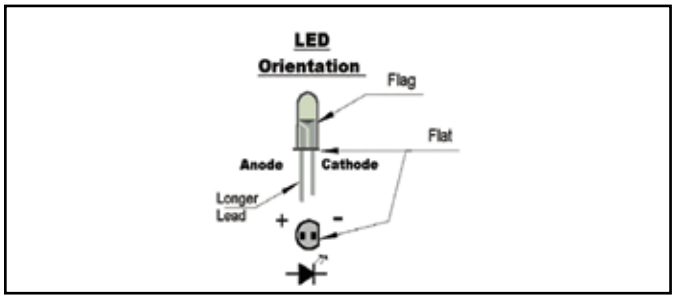
Black Scanning LED Turn Signal Set features a black finish and is fitted with a scanning LED function. **VT No. 33-1878**



Did you know?

LED lights are polarity sensitive. It is a smart idea to test LED assemblies, is not color coded prior to assembly.

LED Polarity

Ever soldered a LED into your project backward it can really mess up a good day! If you don't know, LED's have a positive and a negative side, and will only light when wired correctly. Most LED's have one longer lead to indicate the polarity, but not all.

Warranty

All Lighting (Headlight, Taillight, Signal, Spotlamp and Marker) sold as individual pieces or in kits are covered under our warranty "Replacement Only" Provision. All lighting related items part numbers begin with a 33 prefix. No credit will be issued for these items as they are exchange only.

All custom turn signal/lights require load equalizer.

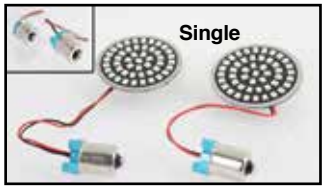
Dual



Single

Cyron Turn Signal Wide View Insert Set
These lights can be seen from much greater angle by other vehicles and drivers on the road. This makes them much more effective when traveling close to the other driver's "blind spot". It is NOT necessary to be directly in front, or get behind a bike equipped with these wide view LED lights to be seen.

In addition, we created a subtle but very cool feature to the "Halo" outer ring of LEDs. When you light them up, they gradually go to full power creating a nice fade effect.

Did you know?

LED lights are polarity sensitive. It is a smart idea to test LED assemblies, is not color coded prior to assembly.

LED Polarity

Ever soldered a LED into your project backward it can really mess up a good day! If you don't know, LED's have a positive and a negative side, and will only light when wired correctly. Most LED's have one longer lead to indicate the polarity, but not all.

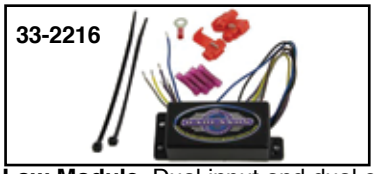
Turn Signal Equalizer



Intensifier Hi-Low Module. Dual input and dual output will convert single function LEDs, Halogen or Incandescent bulbs to high and low dual functions. Works for tail lamps, signals, marker lamps, rear fender tips, LED accent lighting, driving lights or any application where 2 intensities are desired. There is 2 inputs and 2 outputs. Module will run & stop or high & low. Also does run & turn for a pair of turn signals with 1 module. Runs up to 100 watts total for driving lights. For any 12 volt system.

VT No. 33-2216

Turn Signal Load Equalizer returns amperage draw to correct factory specifications when aftermarket marker lamps are used to replace stock turn signals in bikes with self-canceling systems (1991-99). **Note:** For all 2000-up models and 1991-99 models using LED signals use load equalizer III only.

VT No.	Brand
33-2137	Badland LE-01
32-1558*	Volt Tech
32-0874	Volt Tech
32-2142	Badlands LE-02 for models with 4 way flashers same features as LE-01
32-2148	2 Pin for LED turn signals on bikes
32-2149	3 Pin for use with 7 amp batteries or higher

***Note:** Black wire is ground and two yellow wires.

Turn Signal Load Equalizer III designed to specifically work on all Twins with OEM Alarm System or self cancelling turn signal module. Solid state design works with Halogen or LED signals and eliminates erratic blinking of signals. **All Equalizers** are Plug and Play except 33-2138 and 33-2014 which are hardwire.

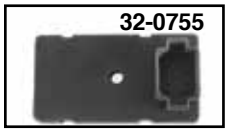
VT No.	Brand	Fits
33-2138	Badlands	1988-13 FLT, 1991-10 FXST, 1994-11 Dyna, 1991-03 XL
32-2014	Volt Tech	As Above
33-2213	Badlands	1997-13 FLH, 1996-10 FXST, FLST 1997-11 Dyna, 1999-03 XL
33-2214	Badlands	2004-13 XL
32-2143	Badlands	2010-13 FLTR only (Street Glides & Road Glides only)
32-2144*	Badlands	2011-up FXST, FLST, 2012-up
32-2145*	Badlands	2012-up FXSTB, 2011-up FLST only
32-2146*	Badlands	2014-up FLT
32-2147*	Badlands	2014- up XL

***NOTE:** The ONLY time a load equlaizer is needed is when you install aftermarket turn signals on a 2011-UP FXST, 2012-UP Dyna or ANY 2014-UP model and you have rapid flashing turn signal indicator lights. The bike will also throw a trouble code. Unlike earlier equalizer modules, CAN/Bus bikes require (1) module for front and (1) module for the rear turn signals.

Illuminator Pro Module. This module control features automatic cancelling of signals. Front running lights and turn signals on single filament halogen on incandescent bulbs and LED's. Rear running lights, brake light function and turn signals on single filament halogen or incandescent bulbs as well as LED's. Built in load equalizer runs LED's up to 50 watts per lamp and emergency flasher mode that does not build up heat. Use on all Twins without self canceller.

VT No 33-2207

Canceller



Turn Signal Canceller replaces stock units as equipped on the following model years. ***Note:** Namz Brand.

Badlands ATS-03 Self Canceling Modules are designed to provide a less expensive alternative to the factory flasher module. The ATS-03 module not only has a built in 11-second flasher but it also is a Load Equalizer which allows you to use small incandescent bulbs, halogen bulbs or LED's without any rapid-flashing issues. The ATS-03 also has a 4-way flasher feature for safety or parade mode just like the factory flasher unit. Note: Be sure to identify which connector is on the bike before purchasing as the factory was not consistent during 1994-2000 with connector.

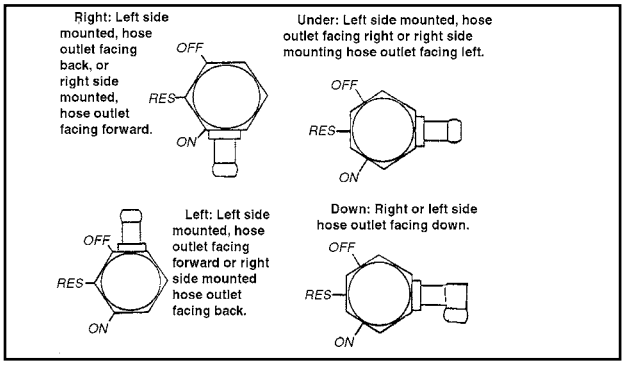
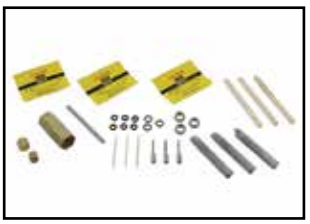
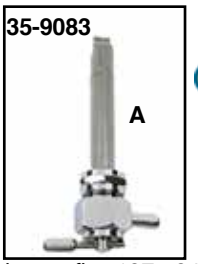
Trock "TRO CY" Brass Petcock features "full bore" flow. Solid machined natural brass, with ⅜" NPT thread and ⅜" hose end.
VT No. 35-1955





Pingel® Fuel Valve Rebuild Kit designed to work with single or dual outlet Pingel® reserve fuel valves. Rebuild kit includes enough rebuilding parts for three fuel valves plus all tools, photos and instructions are included.
VT No. 35-9290



Pingel® Fuel Valve with nut fits 1975-94 and without nut is ⅜" NPT for 1975 and down. Unit features a metric nut utilizing right and left hand thread, so once installed adapter nut can be loosened, valve put in the desired position and nut re-tightened. No need to use Veloprene coated tapes meaning less chance of leakage. **Note:** For use with 5⁄16" fuel line.

Dunlop Elite 4 Cruiser/Touring Tire

- Multi-Tread (MT)Tires have long wearing compounds in the center of the tread and lateral-grip in each shoulder to maximize cornering performance.
- Tire is tubeless
- H-rated for speeds up to 130 mph.
- Offers significantly higher mileage when compared with current single compound tires. Bold new tread pattern offers excellent grip in wet and dry conditions, with a particular focus on even wear and lower road noise.
- Blackwall

150 Series Rear Tire Kit includes 150 Dunlop tire, brake caliper, splash guard, wheel spacer, hardware, and tail lamp assembly. Fits 2000-17 rear FXSTS, FXSTB.

Michelin Commander III Tires

The embodiment of the tire maker's "Michelin Total Performance" promise: dry performance, wet weather grip and longevity. Building on the power reputation of the Commander II Tire, the Commander III promises to raise the standards for V-Twin and cruiser tires to an all-new level. The Commander II offered dry handling and sure-footed wet traction with virtually none of the expected penalty to tire longevity. **Note:** The Commander III "Cruiser" Tires and "Touring" are unique tires. Each model features a specific set of sizes, distinct sidewall designs and slightly different patterns. Available in blackwall only. All sizes are tube/tubeless unless noted.

46-0306	1¾" Wide Whitewall
46-0307	1" Narrow Whitewall

The original "Gangster" since 1985!

16" Coker Tire is available 2" wide whitewall or blackwall. Full height is 5.00" x 16" profile. V-Twin was the first to use the term **GANGSTER WHITEWALL** for motorcycle tires in 1985.

VT No.	Type
46-0255	2" Wide Whitewall
46-0037	Blackwall

Coker 500 x 16" Treadwall Trackmaster is a tube type tire. Tire measures 25.75" in diameter and features a width of 4.75" when inflated on suggested 16 x 3" rim. The four-ply construction is authentic for most restorations of vintage motorcycles.
VT No. 46-0044

Vee Moto Highway Deluxe Tires replace the classic style of the 1960's with its grooved tread pattern, narrow profile and are available in black or white sidewalls. These are a great addition to complete the vintage look on your chopper. Vee Moto tire use high-quality materials and the manufacturing ensures extremely higher quality compared to vintage tires of the past. Vee Moto tire are 6 ply tires and are available in two tread options. Mt90-16 H-rated and 500-16 that is S rated. Both size are available in black wall, double white stripe and whitewall sidewalls.

VT No. MT90-16	VT No. 500-16	
46-3001	**46-3015**	Blackwall
46-3003	**46-3017**	Double White Stripe
46-3002	**46-3016**	Whitewall

****WARNING:** Newly fitted tires should not be subjected to sudden acceleration, hard cornering, or maximum power or braking for at least 100 dry miles. Loss of control and serious injury or death may be a result in doing so. By waiting till the 100 mile break in the rider will become accustomed to the feel of the new tires or tire combination. You should check and adjust inflation pressure to recommended levels after tires cool for at least 3 hours following run in.

Shinko Flat Track Tires are designed and tested to perform at the highest level of the sport. The SR267/268 is available two different compounds, soft or medium, to give you the best tire for any track. Proven performance. DOT approved. Tube type only. H Speed rating. 67 load index front tire. 71 load index rear tire.

Over 25,000 sold since 1977!

Replica™ Early Leather Solo Rolled Seats by Corbin-Gentry are constructed using genuine drum dyed leather cover with padding on an accurate steel formed and ribbed baseplate with brackets riveted in place as original. Authentic style seams are accomplished by first riveting a leather strip to the seat pan and then form fitting the leather cover to the saddle, and finally sewing the cover to the strip. Edge is the "Rolled Edge" where the leather is covering the seam between the cover and fastening strip.

CORBIN-GENTRY

CORBIN GENTRY Original

The Solo Seat

The standard **Solo Seat** carries the 52004-25 part number, the longest running part at 100 years! Changes in the cover include Cowhide leather, Rhino and synthetic materials. Tested by police squads thru their dealer. The synthetic by DuPont cholorsulfonated polyethylene was produced in Dupont's Newbugh, NY factory along with their "Fabrikoid" automotive seat covering.

A Note about our Leather Solos

There are literally over 1000 different type of seats on the market today, but if you still want something really comfortable on long trips the old plunger style seats are very hard to beat. This leather covered contoured seat fits like a glove and the plunger action will keep your ribs from dropping to your knee caps by absorbing those large bumps such as rail-road tracks and manhole covers.

Our leather is top grade cow hide for a long lasting appearance. A chrome passenger rail is available for both styles. When you ask any cop, who has ridden the freeways and highways of the USA for 30 or more years, what he misses most on his late model, he will tell you short and simple: the seat.

-Ray Boone RBE 1987

Motor Shop Cylinder Finishing

Power Stroke Hone

Kwik-way Boring Bar

Shop Services Procedure:

• Call for Return Goods Authorization (RGA)#

• Obtain RGA # and return to

Motor Shop Procedure
7 Scobie Drive
Newburgh, New York 12550

• Finished work order will be returned by UPS

Cylinder Boring Service. The V-Twin Motor Shop will bore and hone customers cylinder and fit to next oversize required pistons. Boring will done on a Kwik-way Boring Bar and honing will be done on a vertical Winona Van Norman Powerstroke Hone for a precision fit. Choose any brand of piston from our catalog section and note VT Part Number on Work Order/Authorization Form. Work will be performed on sets of cylinders only. Pack cylinders with care as we are not responsible for broken fins in shipping.
VT No. 60-0167

Motor Shop Services Cylinder Sleeving. Send in your worn out original cylinder and Motor Shop Services will bore and fit new LA sleeves liner. Cylinder will then be finished honed to V-Twin standard piston size. Work Order Authorization Number required before sending in. Pack carefully as we are not responsible for broken fins. Service is done per cylinder. Sleeves are also available separately.

Flywheel Rebuilding

FLYWHEEL REBUILDING SERVICE.
We will install new shafts, crank pin, rollers, cages and wrist pin bushings for years listed. Ship your rebuildable matched right and left Flywheels with connecting rods and we will return the Flywheel C.O.D. and notify you if any extra charges are incurred during the rebuilding. Tedd Cycle, Inc. original service since 1969 with a turn around time of 15 working days.

V-Twin Motor Shop Twin Cam Flywheel Remanufacturing Services
Flywheel that are out of round or scissored can be repaired. The new flywheels on the 1999-up Big Twin are pressed together, but no match for our V-Twin Motor Shop. We will press apart and disassemble this style wheel assembly, inspect shafts, and crank pin components. V-Twin Motor Shop will rebuild your Twin Cam flywheel assembly to OEM specification using new bearings, crank pin and solid plugs, then balance and true. We can also weld the pin and plugs, if requested, at the flywheel and crank pin interface, for rigid power. We stock the bearings, cages and oversize crank pins to provide you with the components at hand when your flywheel arrives. We will hone the rods to allow the oversize pin to be fitted as required. Flywheel set will be trued and balanced. The final assembly and press is complete in our dedicated TC-88 flywheel fixture assembly.

We install new hardened crank pin and bearing set into the rebuildable rods. If required, new connecting rods can be installed with customer's authorization. We balance the wheels for the new parts and stock piston weight. We press the flywheel halved back together and true the bearing journals to .001" or less. Truing the bearing journal eliminates engine vibration at cruise speeds.

V-Twin Motor Shop can also install solid crank pin expansion plugs and then tig weld the pin and plugs so flywheels won't flex or scissor. This extra step can help prevent future problems. The rebuilt flywheel is stronger than stock OEM.

For a smoother running engine, high speed balancing is done on a Sunnen Dynamic Balancer. This service will require customer's piston or purchase of new piston kits from V-Twin.

We also offer several other machine shop services. V-Twin Motor Shop can also weld and repair all types of metal and aluminum parts like crank cases, cylinders and heads.

Our newly developed TC-88 Flywheel program allow Twin Cam model flywheels professionally rebuilt in V-Twin Motor Shop.

To Request a work order number or for any questions please contact our Motor Shop department.

41-0996	Heavy Duty	50w Non-Synthetic

Motor Shop Ready Transmission/Primary Formulated Lube is a synthetic blend lube to provide excellent lubricity for the anti-wear requires of transmission gears and primary components. Adds protection between moving parts and out performs conventional oils. Use in all Big Twin transmissions and primary chain case 1984-up Sportster transmission and primary case 1971-up.
VT No. 41-0993

Motor Shop Ready Oil is available in heavy duty, synthetic blend and full synthetic weights.
Synclean Synthetic Blend type extends engine life significantly reduces engine wear, resists thermal breakdown and out performs conventional oils in engine cleanliness, fuel economy and protection between moving parts.
SynGold Full Synthetic Oil is uniquely designed to help provide outstanding levels of fuel economy performance, cleaning power and engine protection even during longer oil change intervals. *SynGold* is proven to significantly reduce wear and viscosity breakdown because of its advancements in oil technology.
All are sold in case of six. Our quart bottles designed for easy pouring and storage.

The V-Twin Motor Shop has the components in stock, at the Motor Shop, No Excuses for Parts Availability!
We have the machines, machinists and components to facilitate your rebuild!

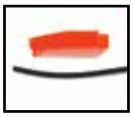
Tools for Oil Changes

Jims Engine Dipstick Socket and Adapter allows riders and mechanics to quickly and safely remove the engine oil level dipstick that lies precariously close to a scorching hot for FLT or FXD models exhaust pipe. Features include a square hole for ⅜" ratchet fitment, and a cutout hole, ⅞" hex for wrench fitment and a cutout for clearance around exhaust pipe. Use on all 2007-16 FLT models and 2006-17 FXD models.

VT No.	Item
16-2759*	Socket
16-2760	Adapter

Note: Socket can be used on 2012-up FLT and Dyna models but requires separate purchase of adapter **16-2760**.



Oil Catcher Pan is used when removing oil filter to avoid spilling oil onto engine cases. 12" tube directs oil flow into oil drain pan.

VT No.	Fits
16-0094	2009-17 FXD, 2004-up XL, 2009-16 FLT
16-0256	2017-up FLT

Slim Design Oil Filter Wrench features a slim 14 flute design to fit most filters, and ⅜ ratchet drive hole and slim design that allows more clearance for oil filter removal especially oil coolers and crank position sensors. **VT No. 16-1941**

Oil Drain Reservoir. 2.5 gallon. Low profile fits under frames on Softail and FLT models.
VT No. 16-0585

Black Oxide Oil Filter Wrench fits all spin on filters. ⅜" drive. Fits all models and TC-88.
VT No. 16-0743

Oil Drain Spigot fits 2009-up FLT. Tool has a red anodized finish keeps the fluid off of the frame. This tool channels the transmission fluid from the bottom of your transmission case into the drain pan instead of onto your frame. The tool has a helical design that locks the tool into the frame cross member and around the drain plug. This allows you to remove the drain plug through the center of the tool. Tool is not heat treated. **VT No. 16-0096**

Oil Catcher Pan

VT No.	Fits
16-0092	1984-06 FXST, FLT, 1991-05 FXD, 1986-06 FLT

M-8 Tool

Jims Main Bearing Remover and Installer for 2017-up M-8 Big Twins removes left or right main bearing without damaging the case. Also provides correct alignment and depth during assembly. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1182

Jims M-8 Cam Bearing Remover and Installer Tool is required 2017-up FLT and 2018-up FXST, FLST M-8 models. This tool holds tighter tolerances which allows for a more precise installation depth. This remover uses the "Jims Style" remover collet as well as "Jims" fine threaded installation driver.
VT No. 16-1185

Jims M-8 Countershaft 1st Scissor Gear Alignment Tool ensures that the scissor gear teeth mesh correctly with the mainshaft 1st fear. For M-8 models. ***Note:** it is installed before the scissor gear is removed to maintain alignment of the gear halves under spring pressure.
VT No. 16-1190

16-5832

Jims M-8 Balancer Bearing Remover Tool is for use on 2017-up FLT and 2018-up FXST models. The M-8 engine design incorporates balancers to reduce engine vibration. This tool can remove the balancer bearings both Touring and Softail models without damage to the crankcase. **VT No. 16-5832**

Jims M-8 Balancer Bearing Installer Tool. All M-8 engines incorporate balancers to reduce vibration. This tool has been developed to be used with the balancer bearing removal tool, 16-5832, to precisely install the bearings in the proper location. This installation tool aligns the crankcase via case bolt and dowel locations that allows the bearings to be installed on the work bench without the use of a driver or press. Use on all 2017-up FLT and 2018-up FLST, FXST models.
VT No. 16-5833

M-8 Oil Pump Gear Alignment
VT No. 16-0458

Jims M-8 Cylinder Hold Down Nuts Kit keep the cylinders in place when the heads are removed from the engine. Useful when installing the second cylinder over the piston and rings after the first cylinder has been installed. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1186

Jims M-8 Left Main Seal Removal Tool. The Milwaukee Eight has a new crankshaft oil seal that is difficult to remove without potentially damaging the crankcase bore. The tool is designed to do the job with no chance of damage to the case. Simply insert the removal fingers over the engine output shaft, and then slide the lock collar over the fingers. Once assembled, you can easily remove the seal square to the core by simply turning the wrench. Use on the new Milwaukee Eight engine, 2017-up.
VT No. 16-1200

Jims M-8 Shifter Mechanism Sleeve Remover and Installer is for removing and installing the shifter mechanism sleeve in M8 transmissions. The sleeve can be removed and installed correctly without disassembling the transmission.
VT No. 16-1191

Jims Fork Cap Installation Tool
VT No. 16-1198

Jims M-8 Valve Spring Compressor Adapter for diassembly and assembly of the multiple smaller valves on M-8 ***Note:** Conical valve spring adapter only to be used with
VT No. 16-1771 Valve Spring Compressor Tool.
VT No. 16-1189

Jims M-8 Oil Pump Alignment Tool to either assemble as individual components with supplied studs or as an assembly with the alignment dowel. For the cam support plate along with oil pump, gerotors and pump cover to perfectly align with the pinion shaft flat, all while properly sealing the oil pump o-ring in the crankcase can be a challenge for one set of hands.
VT No. 16-1079

Jims M-8"On Bike" Valve Spring Compressor tool is for use when changing valve springs for performance upgrades, or simply replacing a leaking valve seal. This "on bike" valve spring compressor kit for M-8 engines, works with the cylinder head installed on the motor. Simply remove the rocker box covers and rocker arms, and install this unique compressor on the rocker arm shaft. Once the cylinder is filled with compressed air, the technician can easily rotate the tool and compress the top collar of the valve spring exposing the keepers to remove the top collar, valve spring and seal.
Fits 2017-up FLT & 2018-up FXST
VT No 16-5835

Jims M-8 Wrist Pin Remover Adapter quickly and easily removes the wrist pins in M-8 engines. Save space your tool box, use with Jims TC-88 wrist pin remover tool. Fits 2017-up FLT, 2018-up FLST, FXST. **VT No. 16-1187**

Jims M-8 Cylinder Head Holder is two sided, one side threaded for Twin Cam heads, and the other threaded for M-8 models.
VT No. 16-1188

Jims FLT Inner Primary Shifter Shaft Bushing Tool easily removes both worn bushings and quickly installs the new bushings to the proper location at the same time, without removing the inner primary.
VT No. 16-1193

Jims Swingarm Bearing Installer Tool.
VT No. 16-1194

Jims Axle Installation Guide for 2008-up models with either a 1" or 25 mm hollow axle. Aids in aligning wheel with swingarm and brake caliper during assembly.
VT No. 16-1195

Jims M-8 Cylinder Torque Plate Kit
VT No. 16-1201

Jims Steering Head Race Installer Tool
VT No. 16-1196

Flywheel Tool

Factory Type Crank Truing Machine features cast iron construction. Designed to true stock style flywheels. 10" swing right side, 6" swing left side, 18" maximum center to center. Weighs over 80 pounds. Shipped truck only.

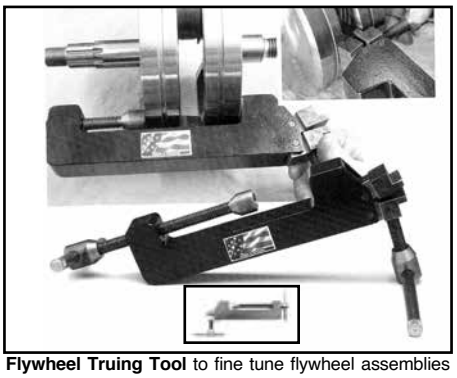
VT No.	Item
16-0586	Machine
16-1703	Hand Wheel
16-1032	Center
16-1041	Right Center

Jims Flywheel Runout Inspection Gauge allows engine builder to check flywheel runout of the pinion shaft while assembled in engine case. Also allows the checking of gear lash on gear driven cams on Twin Cam engines. Gauge fits 1970-84 FL, 1971-84 FX, 1984-up FXST, 1986-up FLST, 1991-up FXD, 1979-up FLT, 1982-94 FXR.
VT No. 16-0383

Gasoila Sealant available in hard setting red varnish or soft set blue/white. Red Sealant is the original sealer for inside crank cases or cam covers for sealing pin holes on porous surfaces. Blue/White seals threaded joints on pipe threads and fittings. Both types are insoluble in oil, gas and solvents. The ¼ pint can includes brush, each.

VT No.	Item
41-0151	Red Varnish
41-0152	Blue/White Soft Set

Flywheel Truing Hammer is a three pound lead/steel that lasts longer than a lead hammer and is still soft enough so that it will not mar flywheels.
VT No. 16-1020



Flywheel Truing Tool to fine tune flywheel assemblies when truing. This tool features both a flywheel expander, and contractor in one easy to use package. Use on all tapered shaft flywheel assemblies.
VT No. 16-0325

Flywheel End Play Gauge for 1930-54 Big Twin.
VT No. 16-0131

Jims Flywheel Locking and Decommissioned Tool locks the flywheel in place making service procedures easier. This tool is very visible and useful to designate a bike as decommissioned. The bike will not start and clutch must be engaged in order to move bike when this tool is installed. Use on all Twin Cams 1999-up and 2017-up M-8 models.

VT No.	Fits
16-2753	Twin Cam
16-1203	M-8

Gasgacinch Gasket Sealer in a 4 oz can sold each.
VT No. 41-0168

Crank Assembly Removal Tool is used to press flywheels from cases, press cases apart and break sealant bond, for 1955-up Big Twin, by Jims.
VT No. 16-1839 1955-05
VT No. 16-1354 2006-17

Flywheel Nut Sockets feature a low profile of 1" tall to give 100% nut contact, machined flat at nut receiving end to eliminate rounding off the nut, by Jims.

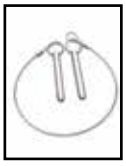
Balance Tool

Jims Beta Engine Hydraulic Balancer Retainer Tool use these retainers to hold the hydraulic tensioners in place when repairing all Beta engines. The hydraulic tensioners are used to keep constant chain tension on the counter balancer system. Without the use of these retaining tools you will not be able to remove or install the balancing system. Use on all Beta Twin Cam engines 2000-17.
VT No. 16-1858

Jims Balancer Scissor Gear Alignment Screw holds the two halves of the spring balancer gear in alignment before removal for easy installation. Use on 2017-up M-8 engines.
VT No. 16-1181



Balancer Shaft Retention Pin use this tool to secure the engine balancers on Twin Cam engines when servicing flywheel assembly. This tool locks into the balancers sprocket pin holes to prevent the balancer from turning out of sync with flywheel. Use on 2000-17.
VT No. 16-1163

Outer Balancer Bearing Installer and Remover Tool removes and installs the outboard balancer bearing on the 96" and 110" "B" Softail engines 2000-17 chain guide support plate.
VT No. 16-1376

Lapping Tool

Eastern Motorcycles Parts, Inc., was begun in the mid-1960's by Gil and Carol May in their garage, where Gil repaired both their own motorcycles and those of some of their friends. After a few years spent building a solid reputation, the couple decided to open their first retail and repair shop, Gil's Cycle Shop, on Long Island, New York. They also sold tanks, pipes, pistons, patches, and other motorcycle parts, and did repairs that ranged from rebuilding generators and rods to complete motors. If a part could not be purchased from the limited suppliers at the time, Gil would have a local machine shop make three or four of that part for him. Then, knowing he would eventually be able to use them, he would have the machine shop make 25, 50, or even 100 of the part to keep on hand.

The Mays eventually decided to buy or make these hard-to-find parts themselves and sell them wholesale to other repair shops and in 1972, Eastern Motorcycle Parts, Inc., was born. In addition to selling tanks, pistons, cylinders, fenders, and other parts wholesale, the company manufactured some parts, such as case bushings, sprocket shafts, pinion shafts, and crank pins, and sent them out for heat treating and grinding. In 1987, Eastern moved to Blackville, South Carolina, where they continue to expand in manufacturing, with many items produced start to finish in house. After more than **forty years** after inception, Eastern Motorcycles, Inc., is still a family-owned business and run his wife Carol, and son Jeff. Tedd Cycle, Inc. has been an original distributor since 1975.

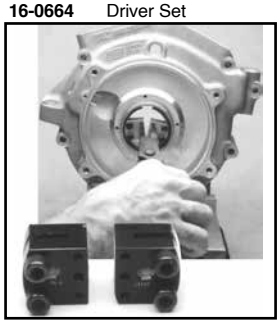
***Note:** Sold separately for 1977-up use with 16-0149 and 16-1837.



1990-98 Big Twin Snap Ring Remover will remove the Timken Bearing outer race snap ring without damage to the case.
VT No. 16-0705

Jims Timken Bearing Race Installer is used to press race in straight in left crank case for 1969-98 Big Twin,1977-03 XL's.
VT No. 16-0668

Sprocket Shaft Bearing & Seal Installation Tool Adapter upgrades Jims bearing installer tool (VT No. 16-1353) for work on fine-splined Twin Cam sprocket shafts. Allows for installation of Timken bearing (OEM# 8028) & roller bearing race assembly (OEM#24004-03) onto the sprocket shaft. For 2007 all 2007-16 Big Twin.
VT No. 16-1364

Jims Main Bearing Remover and Installer for 2017-up M-8 Big Twins removes left or right main bearing without damaging the case. Also provides correct alignment and depth during assembly. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1182

Jims M-8 Left Main Seal Removal Tool. The M-8 has a new crankshaft oil seal that is difficult to remove without potentially damaging the crankcase bore. The tool is designed to do the job with no chance of damage to the case. Simply insert the removal fingers over the engine output shaft, and then slide the lock collar over the fingers. Once assembled, you can easily remove the seal square to the core by simply turning the wrench. Use on the new M-8 engine, 2017-up.
VT No. 16-1200

16-1375

10-0856

Twin Cam Timken® Case Bearing Conversion Tool is a must for the big cubic inch late model Twin Cam 88" or 96" engine. Utilizing the special Jims precision insert, it is designed to easily and accurately convert the left side crank roller bearing (OEM# 24604-00D) to the more durable Timken Bearing (OEM# 9028). This insert is manufactured from aerospace quality steel that is several times stronger than the aluminum case material the standard bearing rides in. The tool includes:

- A new steel bearing insert held under .002" TIR (total indicator reading).
- A press plate that will hold the bearing insert in line with the case bearing bore at the time it is being pressed into case.
- All the necessary drill bits to drill oil feed and return holes, hardware and detailed instructions.

This job can be performed with normal hand tools , a hand drill and a 2 ton press.
Use on Twin Cam engines 2003 to the 2016. Must also use existing Jims Tool (16-0668) for race installation. Order bearing inserts and Timken bearings separately.

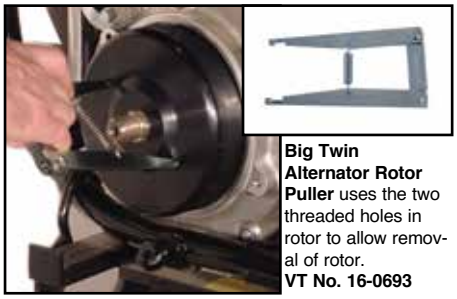
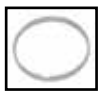
Alternator Repair

Moto Shop Alternator Sealing Ring Replacement Service. Ship in 1970-up left hand case with damaged O-Ring lip and we will machine out and replace with new steel sealing ring.
VT No. 60-0164



Big Twin Alternator Rotor Puller uses the two threaded holes in rotor to allow removal of rotor.
VT No. 16-0693

Big Twin Alternator Rotor Puller uses the sprocket shaft end to center and the two threaded holes in rotor to allow removal of rotor. For use on all 1997-06 FLT with 45 amp charging system. Can also be used on 1997-06 FXST, FLST and FXD that have been graded to 45 amp charging system.
VT No. 16-1054



Alternator Repair Ring Only.
VT No. 16-0692

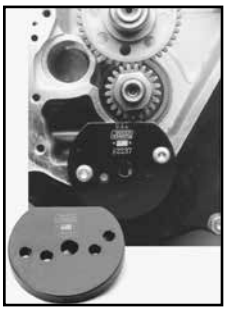
Left Side Case Repair Ring for Twin Cam engines at inner primary.
VT No. 16-0562

Jims M-8 Alternator Rotor Remover and Installer for M-8 engines 2017-up FLT, 2018-up FLST, FXST. This tool will easily remove the high output rotor without damage to the magnets.
VT No. 16-1183

Pinion Tool

Jims Crankshaft Locking Tool is designed to remove and replace the right crankcase bearing. Precision made and piloted using Delrio, a non-marring material, to press bearing in and out straight with no damage to the case. Fits 2003-up FLT, 2003-17 FLST, FXST, FXD. Use on Alpha's left and right case bearings or Beta's left case bearing. For more details see instructions. **VT No 16-1672**

Big Twin Pinion Bearing Race Removal and Installation Tool is used to remove and install the outer race on 1958-98. Replaces 39958. **VT No. 16-0648**



1991-99 Crankshaft Locking Tool fits XL models by engaging the pinion shaft splines. This allows removal and torquing of the pinion nut during installation. Replaces 41506.
VT No. 16-1055

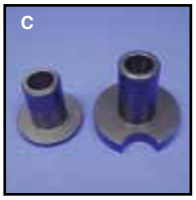
Jims TC Crankshaft Guide use to spread pinion bearing rollers while reassembling right side engine case on to flywheel assembly. Use on 1999-17 Twin Cams.
VT No. 16-1281

Pinion Gear Lock Tool fits 1954-98 Big Twin, when applying torque to pinion nut. By Jims.
VT No. 16-0659

Pinion Shaft Fitting Tool Set. VT No. 16-0393

Jims Twin Cam Right Crankcase Bearing Tool designed to remove and replace the right crankcase bearing in and out with no damage to crankcase. Use on 1999-17 Twin Cams.
VT No. 16-1275

Pinion Shaft Race Installer fits 1977-E81 Sportster models. Replaces 97080-77A. **VT No. 16-0965**



Pinion Gear Puller with collars, used to remove and install pinion gear on 1984-98 Big Twins and 1976 and earlier XL. Order nut wrench separately.

Tappet Tool

Sifton Pushrod Adjustment Gauge for use on Big Twins 1953-84 with hydraulic lifter. Replaces 91438-79. Complete with instructions.
VT No. 16-0993

Jims Tappet Test Stand Adapter for 1984-98 Twins. **Note:** Adapter for use with tester on Evolution Style tappets that bleed down.
VT No. 16-1863

Jims Magnetic Tappet Holder Tool hold tappets up in tappet bores while changing cams, cam support plate or oil pump. For use on Twin Cam and M-8 engines 1999-up.
VT No. 16-1045

Sifton Pushrod Cover Compressor Tool allows removal and installation of pushrod clip. Use on 1936-98 Big Twins and 1957-03 XL.
VT No. 16-1728

Pushrod Cover Compressor Tool pushes against top rocker box to allow one hand operation. Use on 1936-98 Big Twin and 1957-03 XL.
VT No. 16-1052

Jims Tappet Position Holding Tool for all 1991-17 Twin Cam and 2000-up XL engines. This tool allows the tappets and anti-rotation pins to be safely and accurately stored for proper re-installation. Tappet locations are clearly referenced on the tool, which also serves to protect the tappets from damage when removed from engine. **VT No. 16-1031**

Cam Tool

Twin Cam Inner Cam Bearing Tool. This tool will safely install the inner cam bearing in all 1999-06 FXST-FLST and Dynaglide models. Installs bearings to the proper depth in case without damaging bearings.
VT No. 16-1390

Jims Cam Gear Remover and Alignment Tools. The alignment tool is designed to index the cam gears position while removing on installing the cam gear. This tool will allow you to accurately position and or reposition the cam gear from one camshaft to another, as well as allowing you to retard or advance the gear position by up to 10 degrees with the accuracy of a ¼ degree. The cam gear remover tool is use to remove the cam gear from the camshaft. This tool acts as stable base to keep the camshaft perpendicular to the press. Use on all 1970-98 BT.

VT No.	Item
16-1282	Alignment Tool
16-1283	Remover Tool

Jims Camshaft/Crankshaft Locking Tool will lock the gear teeth on the Twin Cam model engine. Instructions included.
VT No. 16-0790

Jims Cam Locking Tool allows removal and torquing of cam sprocket bolts by locking camshaft and crankshaft sprockets. Use on 2006-17 Dynaglide and 2007-16 FXST-FLT models.
VT No. 16-1352

Inner Cam Bearing Remover Tool allows removal of needle bearing and will also keep needles and rollers from falling into engine.

5 & 6 Speed Transmission Tool

Jims M-8 Countershaft 1st Scissor Gear Alignment Tool ensures that the scissor gear teeth mesh correctly with the mainshaft 1st fear. For M-8 models. ***Note:** it is installed before the scissor gear is removed to maintain alignment of the gear halves under spring pressure. **VT No. 16-1190**

5-Speed Main Drive Gear Seal Installer Sets seal to proper depth with transmission assembled. By Jims. **VT No. 16-0664**

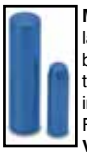
Jims Transmission Countershaft Bearing Tool will install and remove the closed end countershaft bearing on 5 and 6 speed Big Twin transmissions without using a press or tapping with a transmission shaft. Fits 1984-up FXST, 1986-up FLST, 1984-94 FXR,1999-up FLT.
VT No. 16-1883

Cruise Drive 6-Speed Maindrive Gear Remover Tool removes the main drive gear from the main bearing correctly while in the transmission case. This eliminates the need of an arbor press and the risk of case damage. For use on all Twin Cam 6-Speed Cruise Drive models and all 2006 Dynaglide and all 2007 to present Twin Cam models.
VT No. 16-2130

Jims M-8 Shifter Mechanism Sleeve Remover and Installer is for removing and installing the shifter mechanism sleeve in M-8 transmissions. The sleeve can be removed and installed correctly without disassembling the transmission.
VT No. 16-1191

Jims Main Drive Gear Case Seal Installer ensures correct alignment and installs seal to the correct depth without damaging seal. Fits 1986-2006 FLST, FXST, 1991-2005 FXD, 1985-2005 FLT.
VT No. 16-1028

Jims 5-Speed Transmission Main Drive Gear Tool. Use 16-0994 to remove and install main drive gear and install main bearing. Can be used without removing transmission case. Use on all 5 or 6-Speed 1980-up Big Twins.
VT No. 16-0994



Main Drive Gear Seal Installer allows installation of main drive gear oil seal on assembled transmission to proper depth. The protective sleeve included is used for protecting inner bearings of main drive for installation. For 2006-up FXD and 2007-up FLST.
VT No. 16-1363

Big Twin Mainshaft Primary Bearing Race Remover and Installer for use on all 1984-up Big Twins, replaces 34902.

VT No.	Brand
16-1645	Sifton
16-0877	Jims

Replacement Parts for Above Tools.

Gauged Fuel Line Extension Kit is for fuel injected models. The fuel line gauge extension will allow the motor to be run using its own fully functional fuel system. The kit allows the mechanic the ability to check fuel pressure and make adjustments to fuel injection system. Fits 2002-up FXST, FLST, 2002-16 FXD
VT No. 16-1078

Fuel Tank Pro-Stand is for use with Touring models with 6 gallon tanks. The Pro stand allows the fuel tank to be raised 6½" above the frame without removing the console or fuel pump wiring and vent lines, to gain complete access to the top of the motor for fuel injection servicing, dyno tuning and fuel system diagnostics. The Pro stand will also provide a positive lifting point for complete removal of the fuel tank from motorcycle. To run motor with tank lifted, the gauged fuel line extension is required. Fits 2008-up FLT, FLHT, FLHR.
VT No. 16-1077

Service Scan Tool

Computer Diagnostic Service Tool. This tool is capable of diagnosing trouble codes for all 1994-99 computer controlled Big Twins. Available as a standard tool that includes scan tool, software cables, adapters, A/C power adapter and instruction manual. For USA 110v 60 cycles application.
VT No. 16-5000

Daytona Twin Tec Twin Scan Tool for all 2001-up fuel injected models and 2003-06 carbureted models with 12 pin ignition modules reads and cleans diagnostic trouble codes from engine control unit, turn signal/security module, speedometer and tachometer. The Twin Scan is especially useful for diagnosing hard to find intermittent trouble codes. The motorcycle can be operated while the unit is installed under normal condition (no trouble codes) the unit will store data of the last hour of operation. If a trouble code is set the unit automatically stop logging data 30 minutes after the code is set. This allows you examine data before and after the code was set. Twin Scan II+ includes WEGO IID dual channel wide ban exhaust gas oxygen sensor interface for logging AFR date along with engine date.

VT No.	Item	Fits

Battery Maintenance

"Activator" Battery Filler attaches to any standard acid pack tube. Positive thumb release valve absolutely controls acid flow. No acid spills, burns or holes in clothing.
VT No. 16-0037

16-1792

Battery Booster Cable Set. 10 feet in length. 10 gauge in size.
VT No. 16-0350

Deltran Battery Tender LCD Battery Meter allow is for use with the Deltran battery tender harness.
VT No. 16-0595
Deltran Battery Tender LCD Battery Meter.
The LCD displays battery voltage when the button is pressed or when initially plugged in.
For use with Deltran Battery Fender Harness. The red LED flashes when voltage is low. 3-16 voltage range.

16-1870

Super Smart Battery Tender constantly monitors battery without the damaging effects of a trickle charger. Initial charge brings battery up to full charge then converts to a float charger, keeps a 12 volt battery at 13.6 volts.

VT No.	Type
16-1792	12 volt
16-1870	12 volt, Junior Tender
16-1794	Snap Cord

Battery Eliminator allows operation of Magneto models without battery and boosts spark voltage when starting and prevents light flickering at low engine speed.
VT No. 32-0548

Skyrich Automatic Battery Charger. 12 volt 2 amp intelligent battery charger for Lithium-ion and lead acid batteries. Includes power cord, alligator clip cord and quirk disconnect cord.

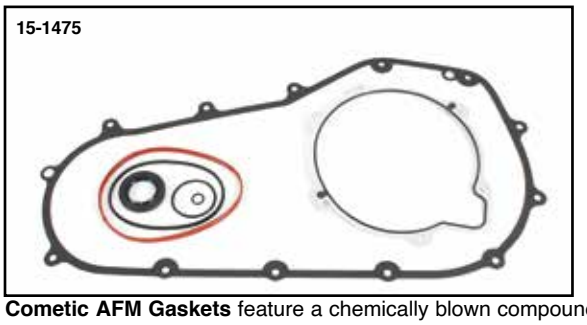
COMETIC GASKET



15-1475

Cometic AFM Gaskets feature a chemically blown compound nitrite synthetic rubber bonded to an aluminum core that has a temperature resistance of over 2500 degrees F. AFM does not require gasket sealers or silicone bead and re-torque of mounting bolts is not required.
